MacBook Pro is built on the revolutionary Intel® Core 2 Duo — which packs the power of two processor cores (up to 2.33GHz) inside a single chip. It provides 4MB of Smart Cache, L2 cache that can be shared between the cores as needed. It delivers higher performance in 2D and 3D graphics, video editing, and music encoding. But the new engine is only part of the story. MacBook Pro supports hard drives up to 200GB and up to 3GB of 667MHz DDR2 memory. And now every MacBook Pro boasts both a FireWire 800 port and a double-layer burning SuperDrive. Ultimate speed, performance, and connectivity. To go. What makes MacBook Pro so mobile? Performance in a portable package. Only one inch thin and 5.6 and 6.8 pounds, respectively, the 15- and 17-inch MacBook Pros are amongst the thinnest, lightest notebooks in their display class.

What’s included..
- Firewire & USB2 Ports
- Lithium-Polymer battery
- Apple Remote
- Install/Restore DVDs
- Airport Extreme Card & Bluetooth 2.0

The ultimate for high end digital video editing
- Intel® Core 2 Duo, 2.40GHz
- 17-inch Wide Aspect Display
- 2GB, DDR2-667 SDRAM, 2 DIMM
- 160GB SATA Hard Drive @ 5400rpm
- NVIDIA GeForce 8600GT, 256MB
- SuperDrive 8X

Our Price: $499.00
Academic Price: $699.00
Full Retail: $839.00

Best Value
Our Apple Prices are better than Apple’s Apple prices. Because of Apple’s commitment to JMU, we’ve secured the best pricing possible. Looks can be deceiving: while initially we appear more expensive than the Apple higher education online store; a closer look reveals that our configurations are in fact, a better value.

Processing Power & Memory - Our laptops are configured for today and tomorrow. While lesser powered processors are available through Apple, with less RAM, we believe that these price savings will be lost a few years from now.

Hard Drive - iTunes library, iDVD & iMovie projects alone can take substantial space. Sacrificing hard drive storage for price today will mean storage of projects will suffer tomorrow.

Optical Drives - All of our laptops come with SuperDrives. These drives allow you to burn your DVD creations for use on DVD player. They also function as a storage drive for backup strategy. DL DVD’s hold 9.4GB compared to 700MB for a standard CD-R.

Warranty Coverage - For on-campus warranty support, AppleCare is required.

Mac Book Basic:
- 2.0GHz Intel® Core 2 Duo
- 1.0GB memory
- 80GB hard drive
- Combo drive

Apple Online: $999.00

Add 2.16GHz Core 2 Duo processor $132.00
Add 12GB Hard Drive $68.00
