   Dr. Merle E. Mast, Head
Department of Psychology ............ 271
   Dr. Michael L. Stoloff, Head
Department of Social Work ............ 275
   Prof. R. Ann Myers, Head
The College of Integrated Science and Technology encompasses programs of professional education whose common denominator is the use of science and technology to enhance the quality of life in the modern world.

Over the past several decades, remarkable developments have occurred in science and technology, altering our lives and our society. Continued development of human civilization, as well as of the quality of life in American society, depend on the integration of scientific knowledge, on technical capabilities, on the application of ethical principles, and on an understanding and appreciation of cultural commonalities and differences. Consequently, there is a need for individuals who understand the importance of discipline specialization, as well as cross-disciplinary connections, and also the integration of knowledge for practical application. These individuals must have the flexibility to be able to operate in an environment of uncertainty and complexity, the drive to seize such opportunities as may arise, and the vision and creativity to create new opportunities as needed. Our faculty is dedicated to producing graduates with a scientific knowledge base and a matching set of interpersonal, organizational and technical skills. To this end the faculty not only educates our students, but also serves as a source of inspiration and as role models.

The college places importance on carrying out its role within the community of Academic Affairs, working collaboratively with other colleges, and working in support of division-wide programs and priorities.

Mission Statement
The primary mission of the college is to educate students in the areas of the applied sciences, health, technology and human services, as well as to prepare them to enter professions or to undertake advanced study.

Goals
The goals of the College of Integrated Science and Technology are:

- to develop and sustain a community of faculty that pursues high-quality instructional, scholarly and service opportunities.
- to foster, among both faculty and students, life-long professional development, personal growth, and commitment to ethical behavior.
- to contribute to the betterment of society at local, regional, national and global levels.
- to promote and support a collaborative, interdisciplinary perspective.
- to emphasize innovation.
- to promote the wise use of appropriate technology and the application of scientific principles to everyday life.
- to encourage partnerships with industry, government, public and private agencies, and professional organizations.

Majors and Programs
Students may select from a variety of majors, minors, programs, concentrations and tracks that are available through the eight undergraduate departments in the College of Integrated Science and Technology. Programs offered include the following:

- Athletic Training
- Biotechnology
- Communication Sciences and Disorders
- Computer Science
- Dietetics
- Exercise Science
- Geographic Science
- Health Assessment and Promotion
- Health Sciences
- Health Services Administration
- Health Studies
- Information Analysis
- Integrated Science and Technology
- Physical and Health Education Teacher Education
- Kinesiology
- Nursing
- Occupational Studies
- Psychology
- Public Health Education
- Social Work

Minors
- Chronic Illness
- Coaching Education
- Communication Sciences and Disorders
- Computer Science
- Environmental Information Systems
- Environmental Management
- Environmental Science
- Environmental Studies
- Family Studies
- Geography
- Gerontology
- Human Science
- Integrated Science and Technology
- Materials Science
- Nonprofit Studies
- Science, Technology and Society
- Sport Communication
- Substance Abuse Prevention
- Telecommunications
- Urban and Regional Studies

Cross Disciplinary Programs, Outreach Programs, Partnerships and Academic Centers
The College of Integrated Science and Technology places a high value on partnerships with the community. These partnerships and our outreach programs are integral to our academic programs and assist us in meeting our responsibility to participate in efforts to enhance the well being of our community. We value the impact of experiential activities on the enrichment of student learning. Many of the programs within the college are cross disciplinary in nature, reflecting our commitment and supporting the mission of the college. Further details about these cross disciplinary programs are provided in the “Cross Disciplinary Programs” section of the catalog. A listing of CISAT centers, outreach programs and partnerships may be found on the CISAT Web site.
