FR 307. History of French Civilization. 3 credits. Offered fall. A study of the social, economic, political and artistic development of France from the Middle Ages to 1900. Instruction is in French. Prerequisite: FR 300.

FR 308. Contemporary French Civilization. 3 credits. Offered spring. A study of French life and culture with emphasis on France in the 20th century. Instruction is in French. Prerequisite: FR 300.

FR 315. French Phonetics. 3 credits. Offered fall and spring. Intensive drill in French sounds and intonation patterns. Instruction is in French. Prerequisite: FR 300.

FR 320. French Oral and Written Communication. 3 credits. Offered fall and spring. Intensive training in the use of modern, everyday French with emphasis on conversation and composition. Readings in French will provide a context for discussion and writing. Prerequisite: FR 300 or equivalent.

FR 330. Business French. 3 credits. Offered spring. A study of commercial and technical vocabulary and trade customs in conjunction with practice in the art of commercial communication including interviews, letter writing and simultaneous interpretation. Instruction is in French. Prerequisite: FR 320.

FR 335. Introduction to French Literature. 3 credits. Offered fall and spring. A study of the main literary schools from Classicism to the Nouveau Roman. Textual analysis of sample writings representative of the most important literary movements. Instruction is in French. Required for majors. Prerequisite: FR 320.

FR 339. A Survey of French Literature. 3 credits. Offered fall or spring. 339A: A thorough analysis of selected passages from important authors of the Middle Ages and the Renaissance. Prerequisite: FR 320. 339B: A thorough analysis of selected passages from important authors of the 17th century. Prerequisite: FR 320. 339C: A thorough analysis of selected passages from important authors of the Age of Enlightenment. Instruction is in French. Prerequisite: FR 320.

FR 375. Business and Society in France. 3 credits. Offered fall or spring. This course explores the development of French society in the historical, political, and economic context. In this course several aspects will be investigated: agricultural, textile, fashion, wine industry, and motion picture, music, media industries, and import and export products. In addition, this course will include the study of banking and financial institutions, health and education systems. Prerequisite: FR 300.

FR 400. Advanced Conversation. 3 credits. Offered fall or spring. Discussions deal with topics of current interest. Prerequisite: FR 320.

FR 405. Nineteenth-Century French Literature. 3 credits. Offered fall or spring. 405A: French literature of the first half of the 19th century with special emphasis on the works of Hugo, Lamartine, Vigny and Musset. Prerequisite: FR 320. 405B: French literature of the second half of the 19th century with special emphasis on the works of Balzac, Stendhal, Flaubert and Zola. Instruction is in French. Prerequisite: FR 320.

FR 420. Advanced Genre Studies. 3 credits. Offered fall or spring. 420A: A study of French theatre from the Middle Ages to the 20th century. Prerequisite: FR 320. 420B: A study of French poetry from the Middle Ages to the 20th century. Prerequisite: FR 320. 420C: A study of French narrative fiction from the Middle Ages to the 20th century. Instruction is in French. Prerequisite: FR 320.

FR 425. Twentieth-Century French Literature. 3 credits. Offered fall or spring. 425A: A study of the works of major French writers of the first half of the 20th century. Prerequisite: FR 320. 425B: A study of contemporary French novels written since 1950 with the emphasis on current fiction. Instruction is in French. Prerequisite: FR 320.

FR/ENG 435. Studies in French Literature. 3 credits. Offered fall or spring. A study of selected works of French literature. Instruction is in English. May be repeated for credit when course content changes.

FR 440. French/English Translation. 3 credits. Offered fall or spring. An intensive course in writing and translation from and into English and French. Comparative topics taken from various fields. Comparative terminology. Prerequisite: FR 320.

FR 446. Special Topics in French Literature. 3 credits. Offered fall or spring. Study of a particular topic in French literature. It may cover all or specific French literature genre. Course may be repeated if content varies. Prerequisite: FR 320.

FR 447. Special Topics in French Civilization and Culture. 3 credits. Offered fall or spring. Students will study a particular topic in the civilization and/or culture of Francophone countries. Course may be repeated if content varies. Prerequisite: FR 320.

FR 448. Special Topics in French Linguistics. 3 credits. Offered fall or spring. Students will study a particular topic of French linguistics. Topics could include an introduction to French sociolinguistics and psycholinguistics. Course may be repeated if content varies. Prerequisite: FR 320.

FR 466. Contemporary French Cinema. 3 credits. Offered fall or spring. A study of French cinema from the 1990s until the present and its place in contemporary French culture. The course will focus on films dealing with specific moments or events in French history, as well as the evolution of the French film industry. Films to be analyzed in terms of their socio-political context and judged by their cultural perspective. Prerequisite: FR 320.

General Business

College of Business

GBUS 160. Business Decision Making in Modern Society. 3 credits. This course introduces the concepts of basic technology literacy, information retrieval via electronic and hard copy; along with critical thinking skills. Basic business principles will be introduced to reinforce these concepts and their relationships. The course provides opportunity for applying the skills of oral and written communication to a variety of learning activities. Open to students who have not completed COB 300.

General Education

The Human Community

A “G” in bold and italics or an asterisk (*) preceding the course prefix and number indicates a course which potentially meets general education requirements.

GAFST 200. Introduction to Africana Studies. 3 credits. An introductory survey of basic theoretical concepts to analyze the Black experience, with special focus on the general historical process common to Africa and the African Diaspora.

GAMST 200. Introduction to American Studies. 3 credits. This interdisciplinary course will highlight the student’s role in interrogating the cultural and political function of representations of America in literature, history, philosophy, religion, popular culture, music and art. Students will gain an understanding of why definitions of American identity matter and learn about the contemporary debates that inform the discipline of American Studies today. Questions about the changing role of national studies in the face of globalization are central.

GANTH 195. Cultural Anthropology. 3 credits. An introduction to the nature of culture and its relationship to language, economics, politics, kinship and other institutions in diverse cultures. The course also provides an overview of the theories, methods and ethical responsibilities involved in the study of cultural systems and ethnographic writing.

GANTH 196. Biological Anthropology. 3 credits (B,R). An introduction to the origins, evolution and genetic variability of humans and their relationship to nonhuman primates. Examination of the fossil record, the relationship between biology and culture and human genetics are included. Theories and methods used in the study of biological anthropology are also introduced.

GANTH 205. Buried Cities, Lost Tribes: The Rise and Fall of Early Human Societies. 3 credits. This course takes an archaeological and comparative perspective on the origins of human institutions, including art, architecture, religion, centralized political formations and urban life. The development and collapse of early societies in multiple world regions, including Mesopotamia, Egypt, the Indus Valley, Mesoamerica and the Andes will be explored.

GART 200. Art in General Culture. 3 credits. An exploratory course which aims to develop a non-technical, general, cultural understanding of the space arts, such as architecture, painting,
sculpture and industrial design. Emphasis is on the contemporary.

GARTH 205. Survey of World Art I: Prehistoric to Renaissance. 3 credits.
An introduction to the art and architecture of the world from cave painting through European pre-Renaissance art. Includes ancient through medieval art in Europe and the Near East as well as Asian and African arts.

GARTH 206. Survey of World Art II: Renaissance to Modern. 3 credits.
An introduction to the art and architecture of the world from the Renaissance through Modern ages. Includes European Renaissance, Baroque, Enlightenment, 19th and 20th centuries as well as Asian and African arts.

*ASTR 120. The Solar System. 3 credits.
An introductory course in astronomy, which includes the following topics: motions of celestial objects, eclipses, historical development, the nature of light, telescopes, properties and evolution of the solar system. Students may not receive credit for ASTR 120/121 and PHYS 120/121.

*ASTR 121. Stars, Galaxies and Cosmology. 3 credits.
An introductory course in astronomy which includes the following topics: the Sun, stellar properties, stellar evolution, black holes, the Milky Way, galactic evolution, quasars, cosmology. Students may not receive credit for ASTR 120/121 and PHYS 120/121.

*CHEM 131L. General Chemistry Laboratory. 3 credits.
A one-semester introduction to basic chemical concepts, connected to current, relevant topics and emphasizing an understanding of science as a way of obtaining knowledge. Not available for major or minor credit in biology.

*BIO 114. Organisms (3, 3). 4 credits.
An exploration of how diverse life forms carry out fundamental processes that sustain life, including acquiring and using essential molecules, growing and reproducing, responding to environmental stimuli, and maintaining a stable internal environment. Labs will introduce students to the scientific method in a series of investigative lab and field experiences.

*BIO 222. Interdisciplinary Biology for Engineering and Physical Sciences. (3, 0) 3 credits.
A one-semester interdisciplinary course that introduces students to the fundamental principles, laws and applications of chemistry. Emphasis to understanding the science of biology, to stimulate critical thinking, and to appreciate the interdisciplinary nature of biological investigations. This interdisciplinary biology course is intended for students who have at least sophomore status and who are physical science, engineering or mathematics majors. This course is not available for credit toward the major or minor in biology or biotechnology. Prerequisite: MATH 231 or MATH 235.

*BIO 270. Human Physiology (3, 2). 4 credits.
An introduction to basic physiological principles using humans as the primary organism. Physiological adaptations will be examined at the molecular through organismal levels. Intended for students in health-related fields and Cluster 3 of the General Education program. Not available for biology or biotechnology major credit. Prerequisites or corequisites: CHEM 120 or CHEM 131 or equivalent, and MATH 220 or equivalent.

*BUS 160. Business Decision Making in a Modern Society. 3 credits.
This course introduces the concepts of basic technology literacy, information retrieval via electronic and hard copy; along with critical thinking skills. Basic business principles will be introduced to reinforce these concepts and their relationships. The course provides opportunity for applying the skills of oral and written communication to a variety of learning activities. Open to students who have not completed COB 300.

*CHEM 120. Concepts of Chemistry. 3 credits.
A one-semester introduction to the fundamental principles, laws and applications of chemistry. Emphasis to understanding the science of biology is emphasized. Not available for major or minor credit in chemistry.

*CHEM 131. General Chemistry I. 3 credits.
The first of a two-credit general chemistry sequence for science majors. It is designed to introduce students to basic chemical concepts including atomic structure, periodic properties of the elements, nomenclature, basic stoichiometry, theories related to reactivity and bonding, and the behavior of materials. The laboratory and lecture portions of CHEM 131 must be taken concurrently. Chemistry majors take 135L rather than 131L.

*CHEM 131L. General Chemistry Laboratory. 1 credit.
This laboratory course is designed to complement and supplement the CHEM 131 lecture course. The laboratory and lecture portions must be taken concurrently. Chemistry majors are to take CHEM 135L and 131L.

*COM 121. Fundamental Human Communication: Presentations. 3 credits.
Study of human communication as a process. Overview of the principles and practices of interpersonal, small group and public communication. Emphasis on examining the role of self-concept, perception, culture, verbal and nonverbal dimensions in the communication process, using power and managing conflict, applying critical listening, practicing audience analysis within informative speech making. Public speaking required.

GCOM 122. Fundamental Human Communication: Individual Presentations. 3 credits.
Study of human communication as a process. Overview of the principles and practices of communication in a public environment. Emphasis on examining the role of self-concept, perception, culture, verbal and nonverbal dimensions in the communication process, using power and managing conflict, applying critical listening, practicing audience analysis, and constructing informative and persuasive speeches. Public speaking required.

GCOM 123. Fundamental Human Communication: Group Presentations. 3 credits.
Study of human communication as a process. Overview of the principles and practices of communication in small group and public communication contexts. Emphasis on examining the role of self-concept, perception, culture, verbal and nonverbal dimensions in the communication process, using power and managing conflict, applying critical listening, practicing audience analysis, and constructing informative and persuasive group presentations. Public speaking required.

GECON 200. Introduction to Macroeconomics. 3 credits.
Behavior of systems at the national and international levels. Topics include the methodology of economics as a social science, supply and demand, definition and measurement of important macroeconomic variables, and theoretical models of growth, inflation, interest rates, unemployment, business cycles, stabilization policy, exchange rates and the balance of payments. Not open to students who are enrolled in or who have received credit for ECON 332.

GENG 221. Literature, Culture, Ideas. 3 credits. Offered every semester.
This course will take a thematic approach to literature by examining multiple literary texts that engage with a common course theme concerned with the human experience. Themes address cultural, political, social, religious, or philosophical aspect ideas through literature. Specific topics will vary.

GENG 222. Genre(s). 3 credits.
An examination of representative works in a literary genre, in a set of related literary subgenres, or in both a literary genre and one or more closely connected genres in other humanities disciplines.

GENG 235. Survey of English Literature: From Beowulf to the 18th Century. 3 credits.
A general survey presented chronologically.

GENG 236. Survey of English Literature: 18th Century to Modern. 3 credits.
A general survey presented chronologically.

GENG 239. Studies in World Literature. 3 credits.
Introduction to masterpiece works of world literature with emphasis on non-Western literature. (May be focused regionally or topically.)

GENG 247. Survey of American Literature: From the Beginning to the Civil War. 3 credits.
A general survey presented chronologically.

GENG 248. Survey of American Literature: From the Civil War to the Modern Period. 3 credits.
A general survey presented chronologically.

GENG 260. Survey of African-American Literature. 3 credits.
Survey of literature by African-American authors from the 18th century to the present.

GEOG 200. Geography: The Global Dimension. 3 credits.
This course promotes global understanding through the study of humans, their institutions and processes, and the resulting interactions between humans and the environment. The course will include the study of western and non-western peoples and their social, cultural, political and economic relationships.

GEOG 102. Environment: Earth (3, 0). 3 credits.
A study of geological processes causing global change and their impact on human thought. The relationship between some geological processes and life on the Earth is also considered. Not available for major or minor credit in geology. Students may not receive credit for both GEOG 102 and SCI 102.

*GEOG 110. Physical Geography (3, 2). 4 credits.
A systematic study of earth materials and the internal and external processes that affect earth structure and landforms. Topics include the genesis/properties of rocks and minerals, plate tectonics and the agents of change that drive surface processes and land form development.

GEOG 115. Earth Systems and Climate Change. 3 credits.
This course explores cycles, trends and abrupt events in the Earth system.
An interdisciplinary study within the modern period of arts and humanities. Students will examine the interrelationships among history and the arts, philosophy, religion and the intellectual ideas of the time. Topics will vary by section.

**GHUM 252. Cross-Cultural Perspectives.** 3 credits.
This course is a cross-disciplinary study of a non-Western culture. Students examine the ways people have responded to the human condition from different historical, religious and philosophical positions, and with their own artistic, musical and theatrical expressions. Sections, which vary by instructor, include East-Asian experiences and West-African humanities.

**GISAT 100. Environmental and Energy Sustainability.** 3 credits.
This course explores scientific and technical issues important to environmental and energy sustainability. Students study fundamental chemistry and physics and then apply this knowledge to better understand air quality, water quality, and conventional and alternative energy processes. The class also explores the societal impacts of our energy choices and the potential impact we as individuals can have through personal initiative.

**GISAT 112. Environmental Issues in Science and Technology (2, 3).** 4 credits. Offered fall and spring.
This course integrates the study of biology, chemistry and statistics within the context of environmental issues that include ozone depletion, acid rain, global warming, waste management and biodiversity.

**GISAT 113. Biotechnology Issues in Science and Technology: (2, 2).** 4 credits. Offered fall and spring.
This course introduces current topics in the life science technologies through lecture and laboratory exercises. Topics include advances in genetic engineering, the hierarchy of life and the rise of infectious diseases.

**GISAT 151. Topics in Applied Calculus in ISAT.** 4 credits. Offered fall and spring.
This course introduces the concepts of differential and integral calculus and ordinary differential equations to model real-world applications in science, business, technology and economics. This course includes a computer laboratory component emphasizing modeling and numerical methods. Course assumes familiarity with algebra and trigonometry.

**GISAT 160. Problem Solving Approaches in Science and Technology.** 3 credits.
This course examines issues in modern science and technology as a means to introduce, develop and enhance critical thinking and problem solving skills. Current scientific and technological research and applications will be introduced to reinforce problem solving, instruction in systems thinking and critical inquiry. The course provides opportunities for using both oral and written communication in a variety of learning activities.

**GISAT 251. Topics in Applied Statistics in ISAT.** 3 credits. Offered fall and spring.
This course introduces statistical thinking - the discipline and methods for collecting, analyzing, and interpreting data for making decisions, doing science, and understanding our world. Topics covered include an introduction to data analysis methods, probability and chance, statistical reasoning and inference, and experimental design. The course includes a laboratory component emphasizing hands-on analysis of data taken from a variety of applications in ISAT. **Prerequisite:** Sophomore standing or permission of instructor.

**JUST 225. Justice and American Society.** 4 credits.
This course introduces the student to the conceptual and reality of justice in America. It is a broad-based, interdisciplinary consideration of justice: What it is, what it means, and how it interacts with society and social institutions in American. Philosophical and theoretical underpinnings of the notion of justice and the historical context of justice in American society will be considered.

**KIN 100. Lifetime Fitness and Wellness (2, 2).** 3 credits.
This course is designed to help students adopt and maintain the behaviors associated with an active and healthy lifestyle. Through this course students will learn the importance of maintaining wellness through a physically active lifestyle. Through lectures and labs, students study and develop the behavioral patterns consistent with the current knowledge base in fitness and wellness.

**OMAD 150. Mediated Communication: Issues and Skills.** 3 credits.
Study of how mediated communication shapes the content, meaning and impact of spoken, written and pictorial messages. Emphasis on the skills required to integrate speech, text and imagery into mediated presentations. Consideration of issues involving the critical evaluation of mass-mediated communication, their effectiveness and influence.

**MATH 103. The Nature of Mathematics.** 3 credits.
Topics such as geometry, computing, algebra, number theory, history of...
The first semester of a non-calculus sequence in general physics. Topics include principles of mechanics, thermal properties of matter, wave motion and sound. A working knowledge of algebra and trigonometry is required.

*PHYS 140L. General Physics Laboratory. 1 credit. This laboratory course is designed to complement and supplement the PHYS 140 and PHYS 240 lecture courses. Prerequisite or corequisite for PHYS 140L. PHYS 140 or PHYS 240.

*PHYS 215. Energy and the Environment. 3 credits. Energy use, sources and trends; fossil fuels, heat-work conversions, thermodynamic restrictions and electric power production; nuclear fission reactors and fusion energy; solar energy and technologies; alternative energy sources; energy storage; energy conservation; issues of waste and safety. Environmental, social and economic aspects will be discussed. Not open to ISAT majors scheduled to take ISAT 212 as part of their degree requirements. Prerequisites: One college course in science and one in mathematics.

GPOSC 200. Global Politics. 3 credits. An exploration of political, social and economic issues and structures existing within and between states in the contemporary global community. Students are introduced to alternative approaches to analyzing these issues in diverse cultures and political settings.

GPOSC 225. U.S. Government. 4 credits. An examination of institutions, processes and intellectual concepts which structure American political activity. The interaction of the political system with the changing American society and America’s changing role in world affairs are also treated. The course provides an introduction to quantitative methodology.

GPSYC 101. General Psychology. 3 credits. A study of the nervous system, sensation, perception, consciousness, learning, memory, language, intelligence, motivation, emotion, life span development, personality, psychopathology, psychotherapy, social psychology and the scientific method.

GPSYC 122. The Science of Vision and Audition. 3 credits. A study of human interaction with light and sound waves. Topics include physiological and perceptual mechanisms for processing light and sound, along with connections to real-world applications (e.g., human factors and careers within vision science and audition). Includes activities designed to provide students with in-depth, hands-on experience with course topics.

GPSYC 160. Life Span Human Development. 3 credits. An introduction to human development. Emphasis is on life span processes within physical, emotional, cognitive, psychosexual, social, personality and moral development.

GREL 101. Religions of the World. 3 credits. An investigation of the world’s major religions which will give attention to their origin, history, mythology and doctrines.

GSCI 101. Physics, Chemistry and the Human Experience (3, 0). 3 credits. A survey of the fundamental concepts, principles and ideas of chemistry and physics. Particular emphasis is placed on understanding the development of the principles and their application in understanding the world around us. Prerequisite or corequisite: One of the following: MATH 103, MATH 107, MATH 205, MATH 220, MATH 231 or MATH 235.

GSCI 104. Scientific Perspectives (0, 2). 1 credit. A study of topics selected to allow students to participate in mathematical and scientific problem solving approaches to knowledge. Prerequisite or corequisite as indicated on MyMadison.

GSCI 121. The Physical Nature of Light and Sound (3, 1). 4 credits. A study of the physical properties of light and sound waves. Topics include production, propagation and spectral analysis of waves. Applications to be covered include musical instruments, sound reproduction, room acoustics, optical instruments (cameras, projectors, lasers), and color in art and nature. The course will include outside-of-class experiential activities.

GSCI 161. Science Processes. 1 credit. Observing, classifying, measuring, inferring, communicating, predicting and experimenting in all science disciplines. This course will introduce core science process skills for all science disciplines in a hands-on, integrated laboratory block.

GSCI 162. The Science of the Planets. 2 credits.
The course will focus on the Earth and its neighbors, including the formation, evolution and dynamics of the Solar System. Students will also explore the similarities and differences of different solar system bodies (stars, planets, asteroids, comets) and the possibilities for finding life elsewhere. 

Prerequisite: GEOG 161.

GSCI 183. The Matter of Matter. 1 credit.

This course will focus on the topic of matter: particle theory, forms, characteristics, properties, atomic theory and models, conservation of mass and energy, nuclear reactions, heat transfer within matter, chemical bonds and chemical structures.

A hands-on conversation on how technology, science and engineering come together to describe our world. The course will cover many of the traditional concepts presented in an introductory physics course. The course will treat coordinate systems and their use in describing motion, forces and energy conservation, thermodynamics (temperature, pressure, heat), light (color, ray model, wave model), waves (sound), magnetism, and electricity. The course will indirectly reinforce skills developed in other courses in the cluster including scientific tools (mathematics, graphing, diagramming, experimenting and analyzing data) and using informational resources.

Corequisite: GSCI 163.

GSCI 185. The Way Life Works. 1 credit.

Patterns, energy, information, life’s machinery, feedback, community and evolution. These are major themes in how life works. This course will use these themes as a backdrop for looking at the way life works.

GSOCI 110. Social Issues in a Global Context. 3 credits.

An examination of current social issues, such as inequality and the changing workplace. Addresses questions of definition, nature, history, patterns and trends of various issues. Examines applicable theories and available research, social controls and social policy.

GSOCI 140. Microsociology: The Individual in Society. 3 credits.

This course introduces the discipline of sociology and the subfield of microsociology. We examine the mutually constitutive relationship between the individual and society. Questions addressed include: How does society influence how we think, feel, believe, act, and interact with others? What influences the self, social identity, shared social meanings, social roles, and one’s position in society? How do we, as individuals and as members of social groups, recreate, contest, and change society? 

OTHEA 210. Introduction to Theatre. 3 credits.

Study of the theatre as an art form. Emphasis on introducing students to a broad spectrum of theatrical activity and opinion. Consideration of the components that comprise a theatre event including acting, directing, design, costuming, lighting and playwriting.

GWRTC 103. Critical Reading and Writing. 3 credits.

The course emphasizes the process of constructing a focused, logical, coherent, well-supported thesis or point of view. The students will employ research and formal documentation to produce writing stylistically appropriate to its audience, purpose and occasion. The course also places emphasis on editing for clarity and control of conventions. Instruction in writing and research includes critical analysis of primary and secondary sources through a series of reading and writing assignments. Students are prepared to use reading and writing in their personal, academic and civic lives.

GWRTC 103, or its equivalent, fulfills the General Education Cluster One writing requirement and is a prerequisite for all WRTC courses numbered 200 or above. Formerly GWRT 103.

Geographic Science

Department of Integrated Science and Technology

GEOG 161. Geospatial Tools and Techniques. 1-6 credits, variable.

An introduction to the use of geospatial tools, such as geographic information systems (GIS), global positioning systems (GPS) and remote sensing, applied to a variety of areas, including cultural geography, environmental science, ecology, geology and public planning.

GEOG 200. Geography: The Global Dimension. 3 credits. Offered fall and spring.

This course promotes global understanding through the study of humans, their institutions and processes, and the resulting interactions between humans and the environment. The course will include the study of Western and non-Western peoples and their social, cultural, political and economic relationships.

GEOG 210. Physical Geography (2, 2). 4 credits. Offered fall and spring.

This introductory course is an examination of systems and processes that influence patterns of Earth’s atmosphere, biotic communities, soils and landforms at multiple spatial and temporal scales. Included are classroom and laboratory experiences that are geared toward investigating interrelationships among atmospheric conditions, Earth’s natural surface characteristics and human-induced modifications of Earth’s features.

GEOG 215. Geospatial Tools I—Cartography and GIS. 3 credits. Offered fall.

An introduction to cartography and geographic information systems (GIS). Basic concepts will be illustrated with examples from a variety of application areas, including cultural geography, environmental science, land use, and planning and business.

An introduction to remote sensing, global positioning systems (GPS) and computer fundamentals in geographic science. Basic concepts will be illustrated with practical applications, including hands-on work collecting data with GPS units and exploring sensing images from a variety of different instruments. Environmental applications will be featured.

GEOG 230. Spatial Thinking and Problem Solving. 3 credits. Offered spring.

Introduction to the critical thinking skills associated with problems inherent with spatial components. Identification of the spatial elements of a given problem, the data requirements for addressing that problem, collections/ acquisition, and organization of data and use of geographic information systems to explore spatial patterns relevant to the problem of interest.

Prerequisites: GEOG 215, GEOG 216 and an introductory course in statistics (BISAT 251 or equivalent) or permission of instructor.

GEOG 260. Selected Topics in Geography. 3 credits. Offered occasionally.

Exploration of geographic topics, tools or techniques of current interest. Can be repeated as course content changes.

GEOG 280. Human Geography: The Cultural Landscape. 3 Credits. Offered fall and spring.

The course themes are human culture, cultural variations over the face of the Earth and how these variations are related to selected global issues. Topics covered include world demographics, world religions and languages, patterns of human migration, political systems and human conflict, agricultural systems, and impact on the physical world.

GEOG 290. Human Interactions with the Physical Environment. 3 credits. Offered spring.

This course evaluates human-environment interactions from a holistic point of view. It incorporates geographic perspectives of these interactions, which include political, cultural, social, economic and ethical factors that influence how people perceive, impact and manage the natural world. The course will emphasize geographic theories of resource use, humans as part of the landscape and human vulnerability to environmental changes.

Prerequisites: GEOG 210 and GEOG 280.

GEOG 300. Population Geography. 3 credits. Offered fall and spring.

An introduction to population measurement, sources of population data and modern population problems. Topics include distribution, the changing age structure and migration issues affecting the U.S. At the global scale, topics include distribution, global migration patterns, the refugee crisis and prospects for the rapidly increasing human population.

GEOG 305. History and Philosophy of Geography. 3 credits. Offered fall and spring.

Topics from the classical period to the modern period include 20th century theories and paradigm shifts involving cultural geography, physical geography, human-environment traditions, regional geographies and modeling. Diverse philosophies such as quantitative/positivist, qualitative/humanistic social theory and GIS are viewed for their contributions to the discipline of geography. Prerequisite: Junior standing or permission of the instructor.

Courses cover environmental issues such as air pollution, forest and wildlife management, water, resource management, soils and land use, and energy and the environment (among other topics). Courses examine the interface between humans and environmental systems while addressing the impact of social, economic and political systems and activities on the environment. May be repeated as course content changes.

GEOG 311. Endangered Environments. 3 credits. Offered spring.

In this course an investigation is made of a selected number of environmental problem areas around the world. Some examples include the temperate rainforest of Valdivia, South America, the tropical rainforests of Borneo and the Aral Sea of Eastern Europe. In the course, students will explore physical aspects of each environment and explore human impact and potential solutions to the problems.
This course exposes students to the methods and techniques commonly used by geographers while conducting fieldwork. The course will cover identifying and defining a researchable project, designing and testing data collection methods, and different methods of collecting, recording and presenting data. Students will also become familiar with various types of field equipment.

GEOG 220. Human Dimensions of Global Change. 3 credits. Offered once a year. 
This course addresses global change and human development. Conservation, sustainability and development are core themes that will be related to current changes occurring on a global scale. Global changes to be discussed in the course related to the climate, biodiversity, natural resources and human populations. Sustainability will be introduced as a dimension of human development. Prerequisite: GEOG 290.

GEOG 323. The Geography of Human Genetics, Infectious Diseases and Diet. 3 credits. Offered spring
Throughout history, infectious diseases have profoundly affected human populations. Using a case study approach, this course will give students an opportunity to investigate social and historical aspects of infectious disease as well as the microbiology, genetics, biochemistry and medical aspects of human infectious diseases and diet.

GEOG 322. Agricultural Systems. 3 credits. Offered spring.
This course covers four distinct areas: the foundation of agriculture, the nature and distribution of soils on a global basis, the history of agriculture from the original selection of domestic crops to the 20th century, modern industrial agriculture and trade; and alternatives to chemical and energy intensive agriculture in the 21st century. Prerequisite: GEOG 290 or permission of instructor.

GEOG 325. Environmental Ethics. 3 credits. Offered fall.
Examines the basic principles of resource use including geographic, economic, social and political processes. Explores concepts underlying such issues as resource consumption and conservation, environmental perception, resource and environmental conflict, population growth and control, carrying capacity, and the evolution of the environmental movement.

GEOG 327. Climatology. 3 credits. Offered spring.
The systematic study of the atmosphere with emphasis on such phenomena as temperature, pressure, humidity, air masses and fronts; the occurrence of these phenomena on a global basis; and a detailed survey of the worldwide distribution of climate types. Prerequisite: GEOG 210.

GEOG 331. Geography of Virginia. 3 credits. Offered annually.
The course will examine the human and physical geography of the development of modern-day Virginia, providing an overview of its prehistory, then tracing its development from the beginning of the seventeenth century through the present. The course will include an analysis of Virginia's population, resources, and regional landscapes as they have been influenced by physical, cultural, historical, and economic factors. The relationship of Virginia to the rest of the world will also be examined.

GEOG 332. Geography of Europe. 3 credits.
Geographic assessment of regional and national characteristics of the European nations.

GEOG 333. Geography of Russia and the Former Soviet Union. 3 credits.
A study of the people and culture of Russia with an emphasis on their social, economic and political processes and situation. An analysis of how the interaction of geographic, social, political and economic factors affect the lives of the Russian people.

GEOG 334. Geography of East and Southeast Asia. 3 credits. Offered spring.
A survey of the physical and cultural environments of China, Taiwan, Japan, the Koreas, Indochina and the countries of Southeast Asia. Topics covered include weather and climate, physiography, natural resources, population characteristics, political systems, aspects of the economy, and the role that each country plays on the regional and world stage.

GEOG 335. Geography of Africa. 3 credits. Offered spring.
An introduction to the regional geography of Sub-Saharan Africa that examines the physical geography of the continent, the historical roots of its present political geography, the consequences of its colonial past on communities and cultures, as well as its natural resources. Students will examine continental issues such as resource management, food production, hunger, disease patterns and management of wildlife. Prerequisite: GEOG 290 or permission of the instructor.

GEOG 337. Geography of Latin America. 3 credits.
A study of countries in Latin America which includes their physical landforms, weather and climate, biogeography, natural resource base, attitudes toward the physical environment, characteristics of the economy, the current political role in international activities, and population characteristics that include growth rate, distribution, migration and ethnicity.

GEOG 338. Geography of the Philippine Islands: Problems and Possibilities. 3 credits. Offered spring.
Exploration of the Philippines focuses on poverty, environmental conservation, resource exploitation and ecosystem degradation in upland and marine environments. Topics include population dynamics, political pressure and instability, and urban challenges. The future of the country is investigated on all geographic scales with regard to its role in a globalized world economy.

GEOG 339. Geography of the Caribbean. 3 credits. Offered every other year.
This course is designed to give students a general geographical overview of the islands states and territories surrounded by the Caribbean Sea. Students will study physical landforms, weather and climate, environmental issues, population characteristics, history, local and regional politics, and economic aspects of political units in the region.

GEOG 340. Biogeography. 3 credits. Offered spring.
This course emphasizes geographical biogeography and is an advanced physical geography class. Included are analyses of spatial patterns of biota from local to global scales and examinations of the systems and processes that result in spatial and temporal patterns of species existence and diversity, community composition, energy pathways, adaptive traits, and human influences on biotic systems and processes. Prerequisite: GEOG 210.

GEOG 341. Wilderness Techniques. 3 credits. Offered spring.
Wilderness legislation, legal mandates and wilderness issues are examined. Human impacts due to overuse or conflicting uses are studied, as are the philosophical aspects of wilderness ethics. This course is taught entirely in the field. Camping and hiking are required. Prerequisite: Permission of instructor.

GEOG 342. Management and Protection of Natural Resources. 3 credits. Offered fall.
This course provides a managerial perspective for protection and management of natural resources. A systems approach for applied management strategies is provided for aquatic, terrestrial, threatened and endangered ecosystems. Topics include application of state, federal, international laws, regulations, policies and guidelines. Students develop management plans and explore jurisdictional resource protection issues.

GEOG 343. Wildlife Management. 3 credits. Offered fall and spring.
An introductory discussion of applied management strategies for wildlife species and their ecological requirements is provided relative to human influences. Management techniques that are useful for determining population or health status of wildlife species are demonstrated for select vertebrate species. The evolution of wildlife laws, policies and management strategies are addressed to provide relevant awareness into the appropriate concepts of wildlife management.

GEOG 344. Economic Geography and Development Issues. 3 credits. Offered fall.
An overview of the classification of economic activities, the factors involved in the location of various types of economic activities and the regional variation in the standard of living associated with economic development. Additional topics include regional economic growth and types of economic systems and development perspectives, the roles that politics and demographics play in the economic development of a country, and the globalization of economic activities.

GEOG 345. Geography of Poverty. 3 credits. Offered once a year.
This course provides a geographical perspective on poverty faced by communities and countries of the world today. The focus is on how poverty is defined, measured and mapped, the causes and impacts of poverty, theories for ending poverty and organizations that work to address poverty. It includes a geographical study of communities and countries that have successfully alleviated extreme poverty.

GEOG 350. Topics in Geography. 1-3 credits. Offered spring.
Examination of geographic topics that are of current interest. Can be repeated as course content changes. Prerequisite: Permission of instructor.

GEOG 355. Cartography and Geospatial Visualization. 3 credits. Offered fall and spring.
This course examines the fundamentals of visualizing spatial data in static and dynamic environments. Students will learn about cartographic design, thematic cartographic techniques, developing spatial data from non-spatial information and with GPS equipment, and geographic visualizations. Students will also develop a portfolio of hard copy and soft
An overview of geographic information science and its role in technology and society. Spatial databases and descriptive data will be created and implemented into various geographic information systems. Advanced analytical operations will be used to practice the analysis capabilities of geographic information systems. Prerequisite: GEOG 215 or permission of the instructor.

GEOG 375. Political Geography. 3 credits. Offered fall and spring.

Political conflicts and issues are examined. Concepts such as territoriality, nationalism, religious and ethnic struggle, environmental degradation, and freedom and justice are discussed in the context of political unrest. Significant geopolitical theories and social and economic processes are explored.

GEOG 376. Urban Geography. 3 credits. Offered spring.

Study of the city in its geographic setting, giving perspective of modern urban problems, origin and growth of cities and influence of location on city functions. Looks at the internal structure of cities and the influence of the internal structure on its population groups.

GEOG 380. Cultural Geography. 3 credits. Offered fall.

Introduction to cultural geography with emphasis on diversity of language, religion and folklore, as well as culture traits and practices and their historical diffusion. Ties to livelihood, the rural-urban continuum and demographic change are explored, as are foci on philosophy, power, race, class and gender. Exploitation and sustainability will be introduced as dimensions of cultural and environmental interaction.

This course is an introduction to remote sensing, the study of images and other types of data acquired by satellites and aircraft. Topics include the principles underlying multiple types of remote sensing, the properties of common data types, making measurements using aerial photographs, basic digital image processing and applications. Prerequisite: GEOG 216.

GEOG 390. Research Design. 1 credit.

The first in a sequence of three courses designed to involve students in capstone research projects. This course focuses on identifying and designing a research project. Prerequisites: Junior standing and permission of the instructor.

GEOG/BIO 402. Forest Ecology. 4 credits. Offered fall.

A study of the function, structure, and composition of forested ecosystems. The effect of physiography on the distribution of forest communities will be explored. Issues of forest management and restoration will also be considered. Field laboratory topics will include dendrology and sampling techniques in different forest successional stages. Prerequisite: BIO 124 or permission of instructor.

GEOG/ISAT 429. Sustainability: An Ecological Perspective. 3 credits.

Offered spring.

This course examines present global environmental impacts and efforts made to change production and consumption patterns toward those that reduce impact on ecosystems or promote increased ecosystems health. The focus lies in understanding the basic resources of productivity including soils, agricultural systems, agroforestry, forestry and aquatic environments and applying solutions on a personal and community level. Prerequisite: GEOG 320, senior standing or permission of instructor.

GEOG 430. Geography of Crop Plants. 3 credits. Offered periodically.

This course explores the influence of geography on crops and crop development by examining the evolution, genetic diversity and cultivation of agricultural crops. Topics include the origins of agriculture, patterns of geographic spread, and the interrelationships between domesticated plants and the societies that grow them.

GEOG 465. Topics in GIS. 3 credits. Offered periodically.

The course examines varying topical issues in geographic information science. The course may be repeated as course topics vary. Prerequisite: GEOG 366 or permission of the instructor.

GEOG 466. GIS and Geographic Databases. 3 credits. Offered fall.

An introduction to the creation, use and management of digital spatial data used by industry and government. Integration of large spatial data sets into the geographic information system, data management and data exchange, and the geodetic transformation of data sets are emphasized. Digital elevation models, land use data, population data, digital topographic map and street network data will be used. Prerequisite: GEOG 366 or permission of instructor.

GEOG 467. GIS Project Management. 3 credits. Offered fall.

An introduction to geographic information systems (GIS) project management. Basic project management techniques will be applied by defining, designing, implementing and documenting a geographic information system. Prerequisite: GEOG 366 or permission of instructor.

GEOG 468. Internet Geographic Information Systems. 3 credits. Offered spring.

Theoretical and practical exploration of methods, standards and policies related to the development and utilization of geographic information systems on the Internet. Students will create and utilize distributed geospatial data and analytical systems using the World Wide Web and the Internet to address geographical problems. Prerequisite: GEOG 366 or permission of instructor.

GEOG 469. Applications of Geographic Information Systems. 3 credits.

Offered once a year.

The course advances the knowledge of GIS in theory and practice by focusing on specific application areas. Spatial databases and complex attribute data will be created, and GIS modeling techniques will be used to solve problems relevant to the specified topical area. The course may be repeated once for additional credit when the topic changes. Prerequisite: GEOG 366 or permission of instructor.

GEOG 470. Senior Seminar in Environmental Conservation, Sustainability and Development. 3 credits. Offered fall and spring.

This capstone seminar integrates the student's previous class experiences to provide a holistic exploration of linkages between environmental conservation and human development strategies and approaches through in-depth analysis of compelling human-environmental issues. Topics vary by semester and include environmental politics, global perspectives on population, sustainable communities and global biodiversity. For majors and minors only. Prerequisite: GEOG 320, senior standing or permission of instructor.

GEOG 485. Processing Remotely Sensed Data. 3 credits. Offered spring.

This course focuses on computer-based techniques for processing remotely sensed data and applications of these techniques. Subjects covered will include geometric and radiometric correction, image enhancement, data transformations, change detection and quantification, and classification. Both traditional techniques and techniques designed for newly available data types will be examined. Prerequisite: GEOG 385 or permission of instructor.

GEOG 486. High Spatial Resolution Remotely Sensed Data. 3 credits. Offered fall and spring.

This course focuses on the acquisition and use of high spatial resolution remotely sensed data. Topics include aerial photograph acquisition, digital terrain model creation, orthorectification, object oriented image processing, image fusion, visual image interpretation, collecting and processing LIDAR data, and ethical and legal issues associated with high spatial resolution data. Prerequisite: GEOG 385 or permission of the instructor.

GEOG 490. Senior Research or Field Practicum. 3 credits. Offered fall and spring.

Working with a research adviser, student completes an internship, a study abroad program, or project research. Student delivers interim progress reports and an annotated bibliography or other relevant research products. Prerequisites: GEOG 380 and permission of their research adviser.

GEOG 491. International Studies. 1-3 credits.

Student will make arrangements for the international experience. A research project or work-study project will be designed by the student and faculty member prior to departure. The research of work will be carried out in the country of travel. May not be taken for capstone credit. May be repeated for credit.

GEOG 495. Internship in Geography. 3-6 credits.

Practical experience within a public agency, non-profit or private business utilizing geographic methodology. Work experience will be supervised by an official of the business or agency and a faculty member. Periodic seminars and written reports are required. Prerequisites: Permission of the faculty sponsor and the GS Program Operations Manager. May not be taken for capstone credit.

GEOG 496. Senior Thesis III. 2 credits. Offered fall and spring.

Student completes an independent research project, either alone or within an investigative team, to identify and analyze a geographic problem or phenomenon, and provides a written report and public presentation on the problem analysis and solution. Prerequisites: GEOG 490 and senior standing. Taken during final semester of the GS program.
GEOL 497. Independent Study. 3 credits.
Student performs an independent research project, either alone or within an investigative team, to identify and analyze a problem from a geographic perspective. Prerequisite: Permission of the instructor. May not be taken for capstone credit.

GEOL 499. Honors. 6 credits. Offered fall and spring. Year course.

Geology
Department of Geology and Environmental Science

GEOL 102. Environment: Earth. 3 credits.
A study of geological processes causing global change and their impact on human thought. The relationship between some geological processes and life on the Earth is also considered. Not available for major or minor credit in geology. Students may not receive credit for both GEOL 102 and GSCI 102. Prerequisite: GSCI 101.

*GEOL 110. Physical Geology. 3 credits.
A systematic study of earth materials and the internal and external processes that affect earth structure and landforms. Topics include the genesis/properties of rocks and minerals, plate tectonics, and the agents of change that drive surface processes and land form development. The laboratory and lecture portions of GEOL 110 must be taken concurrently.
Corequisite: GEOL 110L.

*GEOL 110L. Physical Geology Laboratory. 1 credit.
This laboratory course is designed to complement and supplement the GEOL 110 course. The laboratory and lecture portions must be taken concurrently.
Corequisite: GEOL 110.

GSCI 105. Earth Systems and Climate Change. 3 credits.
This course explores cycles, trends and abrupt events in the Earth system. Analyses of the geologic record and global climate models provide perspective for understanding paleoclimate and future climate changes, including global warming. Current hypotheses for causes of climate change are evaluated, including plate tectonics, orbital cyclicity, variations in the sun’s strength and human activities. The two reoccurring questions of this class are: What are Earth’s climate stories? How do we know?

GEOL 130. Quantitative Geology. 2 credits.
An introduction to quantitative techniques used in descriptive and predictive aspects of the earth and environmental sciences, with emphasis on algorithmic approaches. The focus is on pragmatic application of mathematical methods to geologic problems, including requirements, uses and limitations. Automatic computation is stressed.

GEOL 167. History and Philosophy of the Geosciences. 3 credits.
As an introductory experience in the Bachelor of Arts in Earth Science, students will be inculcated in the philosophy of geosciences as an interdisciplinary medium for extending classical science viewpoints to complex earth systems. Students will study the geosciences as distinct among sciences, establishing relevance and value of earth science literacy in professional and personal settings.

An investment of a theoretical principle behind evolutionary systems of all types based on mathematical modeling in chaos, complexity theory and artificial life studies with extensive computer experimentation and examples drawn from physical, chemical, biological, economic and social systems. The purpose is to explore what is common and universal to all evolutionary processes.

*GEOL 210. Applied Physical Geology. 3 credits.
A problem-based study of earth materials and the processes that affect earth structure and landforms. Topics include plate tectonics, the genesis/properties of rocks and minerals, and agents of change that drive surface processes and landform development. Quantitative problem-solving skills will be applied to case studies that address 3D visualization and time-based processes, such as earth materials, solid earth and surface processes, natural hazards and engineering applications. Prerequisite: Either PHYS 140 or PHYS 230 or CHEM 131 or by permission of instructor. Corequisite: MATH 205 or MATH 220 or MATH 235 or by permission of instructor.

*GEOL 211. Introduction to Oceanography. 3 credits.
An introduction to the oceanography of coastal environments including barrier islands, estuaries and tidal marshes. The physical, geological and biochemical characteristics of coastal waters will be discussed in the context of the economic and social pressures brought to bear on these areas by an increasing global population. Cannot receive credit for both GEOL 211 and GEOL 401.

GEOL 220. Genetic Mineralogy (2, 2). 3 credits.
A study of mineralogenesis. Emphasis is directed toward mineralogical environments, mineral associations and the geology/mineralogy of classical localities. An appreciation of mineral value and aesthetics is incorporated throughout the course.

GEOL 230. Evolution of Earth (3, 2). 4 credits.
An introduction to the evidence, methods and assumptions used by scientists to unravel the Earth’s origin and history. Emphasis on rock analysis/interpretation, modern and ancient processes of mountain building, origin and evolution of life and the history of the North American continent. Prerequisite: GEOL 110L or permission of instructor.

GEOL 272. Planetary Geology (2,2). 3 credits.
A survey of currently developing ideas in planetology including origin of the planets, meteorites and planetary interiors. Also included are geologic processes and land forms on the moon and terrestrial planets, their modification under various planetary environments, and analogies to familiar earth land forms. Includes laboratory. Prerequisite: GEOL 110L.

GEOL 280. Mineralogy (3, 2). 4 credits.
A comprehensive study of minerals, including: crystallography, mineral phase diagrams, x-ray diffraction, mineral optics with thin section recognition using petrographic microscope, and hand specimen identification of both silicate and non-silicate minerals. Prerequisite: GEOL 110L.

GEOL 290. Optical Mineralogy (3, 2). 3 credits.
A study of the optical properties of minerals and mineral identification with the petrographic microscope. Prerequisite: GEOL 280.

GEOL 291. Writing and Communicating in the Geosciences. 1 credit.
This course prepares students for independent research by providing them the fundamental skills in literature searches, writing, critical reading and communication in the geosciences. Prerequisite: GEOL 110 or GEOL 102 or GEOL 115; must take prior to senior year.

GEOL 300. Introduction to Petrology (3, 3). 4 credits.
Igneous and metamorphic processes explained using crystalization theory, phase diagrams, thermodynamics and geochemistry; laboratory study of rocks, their chemical and mineralogical signatures, and their geologic origins. Prerequisites: GEOL 280 and CHEM 131, or consent of instructor.

GEOL 301. Earth Sciences for Teachers. 4 credits.
Earth science content is blended with a systems approach to provide pre-service teachers with an understanding of how the Earth works, as well as strategies for teaching it. Major content themes include reconstructing the geologic history of the mid-Atlantic, exploring the interaction of living things and the environment, and predicting how matter and energy circulate in the earth system.

GEOL/GEOG 310 A-D. Environmental Impact. 2-3 credits, repeatable to 6 credits.
Focuses on a selected environmental realm. The course will examine the interface between human activities and environmental systems. It will address the impacts of social, economic and political activities on the environment. A-Atmosphere (air pollution); B-Biosphere (vegetation/wildlife); C-Hydrosphere (water); D-Lithosphere (geologic hazards/land issues).

GEOL 320. Meteorology. 3 credits.
A survey of the science of weather including weather forecasting, weather maps and related atmospheric processes. Emphasis is placed on the dynamic aspects of meteorology and the interrelationships of atmospheric phenomena with land masses and the world ocean.

The origin, distribution, and chemical, biological, and physical properties of soil are introduced. Processes responsible for soil properties are emphasized. Field trip highlight the sustainability of soils, their distribution across the Shenandoah Valley and their role in biogeochemical cycles. Prerequisite: GEOL 110 or GEOL 210 or permission of instructor may be granted for students with 4 hours of a lab course.

GEOL/BIO 350. Paleobiology (3, 2). 4 credits.
The evolution and ecological structure of the biosphere from the origin of life to the present, emphasizing the evolution and paleobiology of animal life as shown by the fossil record. Lectures discuss methods used to interpret the fossil record and cover topics such as phylogeny and systematics, functional morphology, biostratigraphy, paleoecology, evolution, and...
extinction. Laboratories focus on the major groups of invertebrates that are common in the geologic record. Prerequisite: GEOL 230 or BIO 114 or permission of the instructor.

GEOL/CHM 355. Geochemistry of Natural Waters. 3 credits. Study of chemical theory and reactions important in natural water systems. The role of atmospheric, geologic and biological inputs in determining the geochemistry of streams, rivers and oceans. Prerequisites: CHM 131 and CHEM 122 or equivalent.

GEOL 364. Stratigraphy and Basin Analysis (3, 3). 4 credits. Lecture emphasizes application of sedimentologic and stratigraphic principles to identify and interpret depositional systems and examines how eustasy (sequence theory) and local tectonics influence the distribution of depositional systems under different plate tectonic regimes. Lab emphasizes critical field observation, application of theory to stratigraphic analysis and writing scientific papers. Prerequisite: GEOL 230.

GEOL 365. Structural Geology (3, 2). 4 credits. Major and minor structures of the Earth’s crust. Mechanical principles involved in folding, faulting, jointing and penecontemporaneous structures. The causes and results of mountain building processes. Preparation and interpretation of geologic maps. GEOL 230 is recommended as a prerequisite. Prerequisite: GEOL 110L.

GEOL 367. Genesis of Solid Earth Materials (3, 2). 4 credits. This course addresses the natural relationship between minerals and the rocks they make up. Using the concept of mineralizing environments, illustrated by classic examples, students will investigate minerals through the processes of mineral genesis and associated rock types. This approach provides insight and predictive value for natural conditions in which specific minerals and rocks occur. Not acceptable for B.S. in geology. Prerequisite: GEOL 110L.

GEOL 377. Earth Surface Processes (2, 2). 3 credits. The interrelationships among climate, landscapes, soils and bedrock geology are examined using the mid-Atlantic region as a conceptual laboratory. Course instruction includes lecture, laboratory and field trip meetings. The processes of rock weathering and erosion and soil formation are reinvestigated. Topographic maps and aerial photography are examined for landforms and landscape evolution. Prerequisite: GEOL 110L, GEOL 210 or GEOG 210, or permission of the instructor.

GEOL 390. Laboratory Techniques in Geology (2, 2). 3 credits. An elective course for science majors. A study of the basic theories and techniques of laboratory methods and instrumentation. Implementation and application of techniques to geological problems. Prerequisites: GEOL 201 and permission of the instructor.

GEOL/MATS 395. Geologic Perspectives in Materials Science and Engineering. 3 credits. A one-semester course which emphasizes the commonalities between the geological sciences and materials science. Course includes topics from mineralogy, crystallography, petrology and structural geology which are also important in metallurgy and ceramics. Prerequisites: An introductory course in any physical science or integrated science and technology (GEOL 110, CHEM 131, PHYS 140 or ISAT 141) and at least one other advanced course in the major.

GEOL/MATS 396. X-ray Characterization of Solid Materials. 3 credits. Covers fundamental principles and theory behind two powerful, X-ray based, technologies: X-ray Diffraction and Energy Dispersive Analysis of X-rays (EDS). Students will collect and analyze data from a single crystal Gandolfi X-ray camera, automated powder diffraction system (focusing goniometer), and EDAX system (EDS). Prerequisite: GEOL 280, MATS/CHM/PHYS 275 or ISAT 300.

GEOL 398. Topics in Geology. 1-4 credits. Topics in geology at the advanced level. May be repeated for credit when course content changes. Topics selected may determine prerequisites. Students should consult the instructor prior to enrolling in the course. Prerequisite: Permission of the instructor.

GEOL 399. Field Geology. 6 credits. Field methods include use of hand lens, compass, telescopic alidade and plane table, and compass traversing. A synthesis of geologic concepts and principles leading to the construction and interpretation of geologic and topographic maps. Prerequisites: GEOL 364 and GEOL 365 or permission of the instructor.

GEOL/BIO 400. Geology and Ecology of the Bahamas. 3 credits. This course explores the geology and ecology of the shallow-water marine environment by examining the preeminent modern example, the Bahamas platform. The Bahamas provide an excellent model for understanding modern and ancient carbonate and reef deposits and a variety of terrestrial/aquatic habitats. Biological processes are responsible for many of the geological features of the Bahamas, so the course considers the biology/ecology of marine organisms in addition to geological topics. Prerequisites: GEOL 110 or GEOL 211 or a 200-level GEOl or BIO course; at least four hours of additional lab science, at least sophomore status, and permission of the instructor.

GEOL 401. Oceanography for Teachers. 3 credits. A comprehensive study of the world’s oceans and the interrelationships among physical, chemical, biological and geological oceanography for pre- and in-service teachers. Special emphasis on the natural history. Prerequisite: GEOL 230 or BIO 124 or permission of the instructor. Prerequisite: 20 credits in geology.

GEOL/BIO 405. Vertebrate Paleontology (3). 3 credits. A study of the origin and evolution of the vertebrates. Emphasis will be on understanding how the processes of earth evolution and biological evolution have interacted through time to produce a coherent picture of vertebrate history. Prerequisite: GEOL 230 or GEO/BIO 380 or permission of the instructor.

GEOL 410. Engineering Geology (2, 2). 3 credits. Study of the applications of geology to engineering practice. Topics include soil mechanics, foundations, engineering classification of soils, slope stability and mineral aggregates. Prerequisites: GEOL 110, GEOL 210 or GEOG 210, and either MATH 231 or MATH 235 or equivalent.

GEOL 415. Geological Evolution of North America. 3 credits. A systematic survey of the tectonic evolution of the North American continent and the corresponding evolution of depositional basins and paleoenvironments. Prerequisites: GEOL 364 and GEOL 365 or permission of the instructor.

GEOL 440. Geophysics (3, 2). 3 credits. A survey of geophysical methods, with joint attention on near-surface and solid earth applications. Topics include seismology, heat flow, gravity, magnetism, electrical methods, ground penetrating radar, and geophysical aspects of plate tectonics. Labs focus on practical experience with data acquisition, reduction, and interpretation and are a combination of field, classroom, and computational activities. Prerequisites: GEOL 110L or PHYS 140-150 or PHYS 240-250 or permission of the instructor.

GEOL 442. Field Geophysics. 3 credits. This course focuses on collection of geophysical data in the field and interpretation, analysis, and technical reporting afterwards. Case studies discussed include applications to geology, archaeology, and engineering. Students will get hands-on experience with geophysical equipment and an understanding of how and where these tools can be applied. Topics include Ground Penetrating Radar, Electrical Resistivity, Magnetism, Seismic Refraction and Total Station Data. Prerequisite: GEOL 110 or GEOL 210 or ANTH 197 or consent of instructor.

GEOL 444. Topics in Geophysics. 1-4 credits. An in-depth investigation into selected aspects of geophysics. Topics will be chosen by the instructor and students and may vary from year to year. Some common candidate issues include earthquake seismology, field survey planning and execution, geophysical interpretation theory and the geophysical underpinnings of plate tectonic theory. Prerequisite: Permission of the instructor.

GEOL 450. Geology Seminar. 1 credit. Prerequisite: Permission of the instructor. An in-depth study of a particular problem in geology (e.g., plate tectonics, astrogeology, low-temperature geochemistry, etc.) Scientific literature will be reviewed and discussed. Prerequisite: 20 credits in geology.

GEOL 460. Hydrogeology (2, 2). 3 credits. Basic concepts of subsurface water as a part of the hydrologic cycle. Topics include storativity and permeability in porous media, principles of flow, computer applications, groundwater exploration, and mapping environmental aspects of groundwater. Prerequisites: GEOL 110L and two semesters of calculus or permission of the instructor.
GER 467. Stratigraphy, Structure and Tectonics (3, 2). 4 credits. Examination of how stratigraphic, structural, and tectonic principles control the character and distribution of rocks. Study of principles, regional patterns in sedimentary rocks, and stresses that deform rocks are explored in laboratory and field exercises. Topics and techniques are discussed within the framework of the 1.2 billion year geologic history of the Virginia region and its connection with tectonic processes throughout the rest of the world. Not acceptable for the B.S. in geology. Prerequisites: GEOL 110L and GEOL 230.

GER 477. Contemporary Issues in the Geosciences. 3 credits. As a capstone experience, this course serves as an opportunity for students to view issues of the Earth system from an Earth-based perspective. Building on previous course work in the major (physical geology, meteorology, oceanography, etc.), students will investigate such issues as global warming, population and sustainable development and environmental ethics. Particular emphasis is placed upon the Earth’s perspective from a historical viewpoint. Prerequisites: GEOL 211, GEOL 320, GEOL 387 and GEOL 377.

GER 489. Quantitative Methods in Geology (3). 3 credits. An introduction to the mathematical methods and statistical techniques that are employed by scientists in the disciplines of geochemistry, geophysics, hydrology and the petroleum/mineral industry. The course provides the quantitative skills necessary to manipulate geological data.

GER 491. Geological Literature and Research. 2 credits. Provides advanced instruction in literature research to meet the B.A. Earth Science and B.S. Geology research requirements. Activities include the identification of a literature-based research problem, literature research techniques, critical reading and discussion, and the preparation of individual review papers on each student’s research topic. Prerequisite: GEOL 291 or permission of the instructor.

GER 494. Internship in Geology. 1-3 credits. Student conducts a research or applied project in geology outside of the university. Requires an approved proposal prior to registration and a final report at the culmination of the project. Prerequisites: Minimum of eight credit hours in geology, GEOL 291 and a geology GPA of 2.5 or higher.

GER 497. Problems in Geology. 1-3 credits. An undergraduate research course in one of the fields of geology. Open to advanced students who have adequate preparation. Prerequisites: GEOL 291 and permission of the instructor.

GER 499. Honors in Geology. 3 credits. Three semester sequence for a total of 6 hours. Prerequisite: GEOL 291 and 3.25 GPA or higher.

German

Department of Foreign Languages, Literatures and Cultures

GER 101. Elementary German I. 4 credits. Offered fall. The fundamentals of German through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour’s work a week in the language laboratory. If student has had two or more years of the language in high school, he/she will not receive credit for the course.

GER 102. Elementary German II. 4 credits. Offered spring. The fundamentals of German through listening, speaking, reading and writing. Practice in pronunciation and development of comprehension. One hour’s work a week in the language laboratory. If student has had two or more years of the language in high school, he/she will not receive credit for the course. Prerequisite: GER 101.

GER 111. Intensive German I. 6 credits. Offered May or June. The fundamentals of German through intensive listening, speaking, reading and writing. This four-week course is the equivalent of GER 101-102.

GER 212. Intensive German II. 6 credits. Offered May or June. The fundamentals of German through intensive listening, speaking, reading and writing at the intermediate level. This four-week course is the equivalent of GER 231-232. Prerequisite GER 102 or 111 or permission of the instructor.

GER 231. Intermediate German I. 3 credits. Offered fall. A thorough review of grammar and vocabulary building, conversation, composition and reading. Prerequisite: GER 102 or sufficient score on the foreign language placement test.

GER 232. Intermediate German II. 3 credits. Offered spring. A thorough review of GER 231 grammar and vocabulary building. Conversation, composition and reading will be chosen to reach competency at the advanced intermediate level. Prerequisite: GER 231 or sufficient score on the foreign language placement test.

GER 266. Contemporary German Literature in Translation. 3 credits. Offered fall and spring. German literature from the 1920s to the present. All lectures and readings are in English.

GER 300. German Grammar and Communication. 3 credits. Offered fall. Intensive training in grammatical structures and their application to oral and written communication. Instruction is in German. Fulfills the College of Arts and Letters writing-intensive requirements for the major. Prerequisite: GER 232 or equivalent.

GER 307. A History of German Civilization. 3 credits. Offered every other fall. A study of society, economics, politics and the arts in central Europe from Indo-European beginnings to the present. Emphasis is also placed on outstanding contributions of German-speaking people. Instruction is in German. Prerequisite: GER 300 or equivalent.

GER 308. Contemporary German Civilization. 3 credits. Offered spring. A study of life, culture, politics and economics in modern Germany. May be repeated for credit. Prerequisite: GER 300 or equivalent.

GER 320. German Oral and Written Communication. 3 credits. Offered spring. Intensive training in the use of modern, everyday German with emphasis on conversation and composition. Readings in German will provide a context for discussion and writing. Prerequisite: GER 300 or equivalent.

GER 330. Business German. 3 credits. Offered periodically. A study of commercial and trade vocabulary and customs in conjunction with practice in commercial communication, including letter writing, interviews and interpretation. Instruction is in German. Prerequisite: GER 300 or equivalent.

GER 335. Introduction to German Literature. 3 credits. Offered periodically. A survey of German literature from 750 to the present. Textual analysis of sample writings of the most important literary movements. Instruction is in German. Prerequisite: GER 300 or equivalent.

GER 341. German-English Technical/Commercial Translation. 3 credits. Offered periodically. German-English translation applied in several commercial (i.e., marketing, finance) and technical (i.e., electricity and electronics, software, hardware) fields. Focus will be on the acquisition of specialized knowledge (both linguistic and extralinguistic) and the delivery of professional documents in real-market conditions. Fulfills the College of Arts and Letters writing-intensive requirement for the major. Prerequisite GER 300 or equivalent.

GER 400. Advanced Conversation. 3 credits. Offered periodically. Discussions deal with topics of current interest. Prerequisite: GER 300 or equivalent.

GER 405. The Age of German Classicism. 3 credits. Offered periodically. Reading and interpretation of significant works of Lessing, Schiller and Goethe. Instruction is in German. Prerequisite: GER 300 or equivalent.

GER 415. German Romanticism and Realism. 3 credits. Offered periodically. A study of Romanticism and Realism with emphasis on Romantic poetry and the Realistic novel. Instruction is in German. Prerequisite: GER 300 or equivalent.

GER 426. Modern German Literature. 3 credits. Offered periodically. A study of the works of major German writers of the 20th century. Instruction is in German. Prerequisite: GER 300 or equivalent.

GER/ENG 436. Studies in German Literature. 3 credits. Offered periodically. A study of selected works of German literature. Instruction is in English. May be repeated for credit when course content changes.

GER 446. Special Topics in German Literature. 3 credits. Offered periodically. Study of a particular topic in German literature. It may cover all or specific German literature genre. Prerequisite: GER 300.

GER 447. Special Topics in German Civilization and Culture. 3 credits. Offered periodically. Students will study a particular topic in the civilization and/or culture of Germany. Course may be repeated. Prerequisite: GER 300.

GER 448. Topics in German Linguistics. 3 credits. Offered periodically. Students will study a particular topic in German linguistics. Topics could include an introduction to German sociolinguistics and psycholinguistics. Course may be repeated. Prerequisite: GER 300.

GER 465. German Cinema. 3 credits. Offered periodically. An analysis of the German cinema from the 1920s though the present.

Course Descriptions 357

http://www.jmu.edu/catalog/12
Emphasis will be on the relations between the German film and certain seminal periods in German history. Prerequisite: GER 300 or equivalent.

Gerontology
Department of Social Work
GERN/SOCI 280. Social Gerontology. 3 credits. Offered fall and/or spring.
An interdisciplinary introduction to the study of aging. The course provides an overview of issues surrounding aging in contemporary society: personal, familial, communal and societal. Corequisite: 20 hours of community service-learning.
GERN 305. Programs and Services for the Elderly. 3 credits. Offered fall.
A review of the programs and services provided for the elderly in the public and private sectors of America. Observations and participation in local programs for the elderly will be required. Prerequisite: GERN/SOCI 280.
GERN/FAM/SOWK 375. Grant Writing for Agencies. 3 credits. Offered on a rotating basis.
Emphasizing active learning, this course teaches the basics of grant and proposal writing. Efficient research, persuasive prose and the importance of relationships are stressed. Private and corporate philanthropy and government grants are examined.
GERN 400. Skills and Techniques in Gerontological Assessment. 3 credits. Offered spring.
The study of the skills and techniques used in assessing the elderly client. Assessment is made from the holistic approach: physical, psychological and social. Prerequisite: GERN/SOCI 280.
GERN 487. Special Topics in Gerontology. 3 credits. Offered on a rotating basis.
Examination of selected topics in gerontology that are of current importance in the field of gerontology. Course may be repeated for credit.
GERN 490. Special Studies in Gerontology. 1-3 credits. Offered fall and spring.
Independent study in gerontology under faculty supervision. Limited to gerontology minors. Can be repeated for credit. Prerequisites: GERN/SOCI 280, GERN 305 and GERN 400 or permission of instructor.
GERN 495. Field Experience/Seminar in Gerontology (1, 6). 3 credits. Offered fall, spring and summer.
Supervised field experience in gerontology settings that allows observation and experience with the well and frail elderly. A minimum of six hours in the assigned setting each week and one hour seminar on campus. Prerequisites: GERN/SOCI 280, GERN 305 and GERN 400, major elective, and approval of the gerontology minor adviser.

Graphic Design
School of Art, Design and Art History
All 200-level GRPH courses are limited to declared art, art history, graphic design and interior design majors during the fall and spring semesters. GRPH courses at the 300-level and above are restricted to graphic design majors. During May and summer sessions, 200-level GRPH courses are open to all students who meet the additional stated course prerequisites. Non-majors wishing to enroll in a GRPH course during fall and spring semesters may request permission of the instructor.
Introduction to graphics on the computer. Students will explore hardware and software that relate to the presentation of graphic design projects and computer generated imaging. Prerequisites: ART 102 and ART 104 or permission of the instructor.
GRPH 202. Design Methodology (0, 9). 3 credits.
Exploration of strategies for conceptualizing, analyzing and solving design problems. Emphasis is placed on graphic presentation of ideas and the creative process. Prerequisite: ART 102.
GRPH 206. Introduction to Typography (0, 9). 3 credits.
An introduction to the study of letter forms for their aesthetic and communicative value. Typographic fundamentals of alphabet history, type classification, printing technology effects, font design, visual space, hierarchy, and grid systems will be explored. Prerequisite: GRPH 200.
GRPH 208. Portfolio Review. 0 credit.
Portfolio review required to enroll in graphic design courses at upper division standing. May be repeated once for pass/fail standing. Prerequisites: GRPH 200 and GRPH 202. Prerequisite or corequisite: GRPH 206.
GRPH 300. Illustration (0, 9). 3 credits.
Through demonstrations, theory and practical application, students are introduced to numerous media and illustrative techniques. Encouraged experimentation is tempered by an understanding of problem solving and conceptualization. Prerequisite: GRPH 208.
GRPH 304. Package Design (0, 9). 3 credits.
Through theory, demonstrations and practical application, students learn to design in three-dimensions. Focus will be placed on aesthetics, as well as the form and function of a product’s housing. Prerequisite: GRPH 208.
GRPH 306. Intermediate Typography (0, 9). 3 credits.
An intermediate study of typography for its aesthetic and communicative value. Context effects on legibility and readability, type as image, type in sequence, and typographic systems will be explored. Prerequisite: GRPH 208.
GRPH 312. Web Design. 3 credits.
Introduction to Web design through theory and practical application. Assignments will focus on the unique form, content and structures associated with designing for the World Wide Web. Special emphasis on the creative process and the graphic presentation of ideas. Prerequisite: GRPH majors: GRPH 208; SMAD majors: SMAD 202.
GRPH 340. Poster Design (0, 9). 3 credits.
Through theory and practical application, students learn to design for the poster realm. Focus will be placed on aesthetics, as well as form and function. Encouraged experimentation is tempered by an understanding of problem solving and conceptualization. Prerequisite: GRPH 208.
Independent activity at the intermediate level, such as research or studio practice, under faculty supervision. Projected studies in any area of the school’s offering must be arranged with the instructors who will direct them. Offered only with the consent of the instructor. Prerequisite: GRPH 208.
GRPH 392. Topics in Graphic Design. 3 credits. Offering varies.
Study of selected topics in graphic design at the intermediate level. May be repeated when course content changes. See MyMadison for current topics. Prerequisite: GRPH 208.
GRPH 406. Advanced Typography (0, 9). 3 credits.
An advanced study of typography for its aesthetic and communicative value. Topics of research, narrative, information design, format organization and production techniques will be explored. Solutions reflect advanced text and image integration knowledge through complex and variable structure development. Prerequisite: GRPH 306.
GRPH 408. Brand Identity. 3 credits.
Exploration of visual identities utilizing a holistic, systems approach to design. Introduces business strategies and design techniques associated with brand development. Emphasis is placed on methods of thinking, research and implementation. Prerequisite or corequisite: GRPH 406.
GRPH 410. Graphic Design Portfolio. 3 credits.
An examination of the business of graphic design, employment strategies and freelance opportunities. Focus is placed on solidification of the portfolio for employment and/or graduate school. This course is strongly recommended for the last semester prior to graduation. Prerequisite: GRPH 406. Corequisite: GRPH 408.
Independent activity, such as research or studio practice, under faculty supervision. Projected studies in any area of the school’s offering must be arranged with the instructors who will direct them. Offered only with consent of the director. Prerequisite: GRPH 208.
GRPH 491. Studio Assistant. 1-3 credits, repeatable. Offering varies.
An on-campus program monitored on an individual basis designed to provide practical studio experience in the visual arts. Students will learn safe studio practices and management skills, including material use, inventory control, and the proper operation of equipment found within various individual classroom studios. Prerequisite: Permission of the instructor.
GRPH 492. Topics in Graphic Design. 3 credits. Offering varies.
Study of selected topics in graphic design at the advanced level. May be repeated when course content changes. See MyMadison for current topics.
GRPH 496. Internship in Graphic Design. 1-6 credits. Offered fall, spring and summer.
An off-campus program prepared and monitored on an individual basis. Internships are designed to provide practical experience in the arts. Prerequisites: Permission of the instructor and GRPH 208; students can only enroll for a maximum of 3 credits per Internship. ART 394 if in museums and galleries.
GRPH 498. Honors (1, 3, 2). 6 credits total for three semesters.

http://www.jmu.edu/catalog/12
Greek
Department of Foreign Languages, Literatures and Cultures
GRK 101. Elementary Greek I. 4 credits. Offered fall.
Designed to provide a reading knowledge of Classical Greek as well as New Testament koine. Greek life, thought and culture are stressed. Especially recommended for science, English and philosophy majors.
GRK 102. Elementary Greek II. 4 credits. Offered spring.
Designed to provide a reading knowledge of Classical Greek as well as New Testament koine. Greek life, thought and culture are stressed. Especially recommended for science, English and philosophy majors.
GRK 231. Intermediate Greek I. 3 credits each semester. Offered fall.
An intensive reading course. Selections from Classical Greek writers and/or the New Testament. Prerequisite: One year of college Greek or equivalent.
GRK 232. Intermediate Greek II. 3 credits. Offered spring.
An intensive reading course. Selections from Classical Greek writers and/or the New Testament. Prerequisite: GRK 231 or permission of the instructor.

Health
Department of Health Sciences
GTH 100. Personal Wellness. 3 credits. Offered fall, spring and summer.
Emphasizes lifestyle behaviors contributing to health promotion and disease prevention. General areas affecting health status are identified. Suggestions are made as to how health-related behaviors, self-care and individual decisions contribute to health and influence dimensions of wellness.
HTH 151. Foundations of the Health Sciences. 3 credits. Offered fall and spring.
Review of the basic competencies and foundations of the health sciences including academic planning, professionalism, writing and presentation skills, information literacy, foundational principles, and the roles and responsibilities of selected health science fields. This is intended to be the first course that a student takes in the health sciences major.
**HTH 204. Emergency Health Care (2, 2). 3 credits. Offered fall and spring.
A survey of various dimensions of the legal aspects of emergency care, cardiopulmonary emergencies, hemorrhage control, wounds, shock, heat injuries and other health emergencies. Selected American Red Cross and American Heart Association certifications available. ** The American Red Cross registration fees apply.
HTH 206. Advanced Athletic Training. 3 credits. Offered fall and spring.
This course involves advanced study of injuries associated with physically active individuals including injury mechanisms, signs and symptoms, and treatments. Other topics include relationships athletic trainers build with other health care professionals; environmental issues related to physical activity; and special needs of various populations. Prerequisites: BIO 290 and HTH 205. Formerly HTH 303.
HTH 230. Community Health. 3 credits. Offered fall and spring.
An introduction to community health including its foundations, the tools of community health such as epidemiology, community organization, disease control and health promotion. The course focuses on the populations, settings and special issues of community health. Prerequisite: GTH 100.
HTH 252. Sexually Related Diseases. 1 credit.
Sexually transmitted diseases and other sexual systems problems (breast and testicular cancer), nonvenereal diseases, chromosomal anomalies, sexual disorders of the genitalia and urinary system problems.
HTH 270. Personal Health Promotion. 3 credits.
A survey of principles for the promotion of optimum individual, family and community health through intelligent self-direction of health behavior. Topics include the physical, mental and social dimension of health economics, disease control, human sexuality, chemical abuse, injury control, and nutrition.
HTH 278. Alcohol: Use and Abuse. 1 credit.
Survey of the drug alcohol. Topics include pharmacological effects, patterns of use, potential for abuse, treatment programs and prevention of alcohol abuse and alcoholism.
HTH 300. Medical Terminology. 3 credits. Offered fall and spring.
Study of terms that relate to body systems, anatomical structures, medical processes and procedures, and a variety of diseases disorders that affect human organisms.
HTH 308. Therapeutic Assessment. 3 credits. Offered spring.
The purpose of this course is to present an overview of established and current knowledge in the major content areas of physiology by examining the impact of work and the working environment on human body systems as they relate to health and wellness. Prerequisite: BIO 290.
HTH/KIN 312. The Profession of Teaching Health & Physical Education. 2 credits. Offered fall and spring.
Introductory study of the roles of the teacher and the learner and the pedagogical content knowledge of health and physical education. An in-depth examination of the unique position and qualifications of the specialist in physical education and health. Systematic observations will occur. Prerequisite: Admission to teacher education.
HTH/HHS/NSG/SOWK 314. Rural Health: An Interdisciplinary Approach. 3 credits. Offered May.
Students study, observe and participate in interdisciplinary assessment, planning and delivery of community-based primary health care in partnership with residents and agencies of a host rural county. Learning activities will emphasize rural culture, rural health care and interdisciplinary practice.
HTH 320. Statistical Methods for Health Science Research. 3 credits. Offered fall and spring.
This course reviews statistical concepts and techniques with special reference to their relation to health science applications and issues. It also reinforces the logical processes associated with statistical decision making, again with particular reference to health and medical research methods. Prerequisites: MATH 220 and HTH 354.
HTH 330. Introduction to Human Disease. 3 credits. Offered fall and spring.
An overview of the incidence, prevalence, causation, and prevention of the major chronic and infectious diseases which are currently of concern in the twenty-first century. Major signs and symptoms of the diseases as well as treatment will be reviewed. The course will also cover the body’s defense system and the principles of disease occurrence. Prerequisite: HTH 230.
HTH 352. Environmental Health. 3 credits. Offered fall and spring.
An investigation of environmental factors and their effects on the health of the individual, community and society. Prerequisite: HTH 230.
HTH 354. U.S. Health Care System. 3 credits. Offered fall and spring.
This course examines the structure and organization of the health care delivery system in the United States. The components, functions, financing and resources of this system are described.
HTH 355. HIV/AIDS: A Global Perspective. 1 credit. Offered fall and spring.
Discussion includes theories of origins, statistics and characteristics of the causative pathogen, incubation, illness patterns, transmission, prevention and treatment of AIDS and other STDs. AIDS and other STDs in relation to prisons, children, schools, global concerns, health care systems and legal factors will be considered.
HTH 357. Coping with Stress. 1 credit. Offered fall.
Identifying causes and personal symptoms associated with stress and individual methods of handling stress.
HTH 368. International Health and Nutrition Studies. 3 credits.
This course involves participation with an interdisciplinary team which will travel outside of the United States to observe and experience the health care challenges in a developing nation.
HTH 370. Child and Adolescent Health. 3 credits. Offered fall and spring.
This course will discuss the CDC priority health risk categories and the Healthy People 2010 Objectives for the Nation as they relate to child and adolescent health. In addition, the CDC model for Coordinated School Health Programs will be explored to determine specific guidelines for health improvement. Prerequisite: HTH 230, restricted to PHETE or health sciences majors.
HTH 371. Behavior and Health of Children and Adolescents. 3 credits. Offered spring.
This course will review the current health status and health risk behaviors of children and adolescents. It will focus on epidemiological trends and behavioral and social etiological factors. In addition, this course will include an overview of the theoretical approaches to children and adolescent health behavior. Application of theory will be made to the development of strategies for health promotion and interventions to reduce specific health problems for children and adolescents that would be appropriate for teachers and schools. Prerequisite: Admission to the PHETE program.
HTH 372. Human Sexuality. 3 credits. Offered fall and spring.
An in-depth study of sexuality across the lifespan. Emphasis is placed on the development of sexuality with attention given to the psychological, physiological, ethical and socio-cultural implications. Prerequisite: HTH 230.
HTH 375. Pregnancy Control and Abortion. 1 credit.
An in-depth study of four areas concerning the following sexual aspects of
