FR 266. French Literature in Translation. 3 credits.
French literature, 1800 to the present. All lectures and readings are in English. Does not count toward a major, minor or licensure in French.

FR 300. Grammar and Communication. 3 credits.
Intensive training in grammatical structures and their application to oral and written communication. Instruction in French. Fulfills the College of Arts and Letters writing-intensive requirement for the major. Prerequisite: FR 212 or FR 222 or sufficient score on the Foreign Language Placement Exam.

FR 307. History of French Civilization. 3 credits.
A study of the social, economic, political and artistic development of France from the Middle Ages to 1900. Instruction is in French. Prerequisite: FR 300.

FR 308. Contemporary French Civilization. 3 credits.
A study of French life and culture with emphasis on France in the 20th century. Instruction is in French. Prerequisite: FR 300.

FR 315. French Phonetics. 3 credits.
Intensive drill in French sounds and intonation patterns. Instruction is in French. Prerequisite: FR 300.

FR 320. French Oral and Written Communication. 3 credits.
Intensive training in the use of modern, everyday French with emphasis on conversation and composition. Readings in French will provide a context for discussion and writing. Prerequisite: FR 300 or equivalent.

FR 330. Business French. 3 credits.
A study of commercial and technical vocabulary and trade customs in conjunction with practice in the art of commercial communication including interviews, letter writing and simultaneous interpretation. Instruction is in French. Prerequisite: FR 320.

FR 335. Introduction to French Literature. 3 credits.
A study of the main literary schools from Classicism to the Nouveau Roman. Textual analysis of sample writings representative of the most important literary movements. Instruction is in French. Required for majors. Prerequisite: FR 320.

339A: A thorough analysis of selected passages from important authors of the Middle Ages and the Renaissance. Prerequisite: FR 320.
339B: A thorough analysis of selected passages from important authors of the 17th century. Prerequisite: FR 320.
339C: A thorough analysis of selected passages from important authors of the Age of Enlightenment. Instruction is in French. Prerequisite: FR 320.

FR 375. Business and Society in France. 3 credits.
This course explores the development of French society in the historical, political, and economic context. In this course several aspects will be investigated: agricultural, textile, fashion, wine industry, and motion picture, music, media industries, and import and export products. In addition, the course will include the study of banking and financial institutions, health and education systems. Prerequisite: FR 300.

FR 400. Advanced Conversation. 3 credits.
Discussions deal with topics of current interest. Prerequisite: FR 320.

FR 405. Nineteenth-Century French Literature. 3 credits.
405A: French literature of the first half of the 19th century with special emphasis on the works of Hugo, Lamartine, Vigny and Musset. Prerequisite: FR 320.
405B: French literature of the second half of the 19th century with special emphasis on the works of Balzac, Stendhal, Flaubert and Zola. Instruction is in French. Prerequisite: FR 320.

FR 420. Advanced Genre Studies. 3 credits.
420A: A study of French theatre from the Middle Ages to the 20th century. Prerequisite: FR 320.
420B: A study of French poetry from the Middle Ages to the 20th century. Prerequisite: FR 320.
420C: A study of French narrative fiction from the Middle Ages to the 20th century. Instruction is in French. Prerequisite: FR 320.

FR 425. Twentieth-Century French Literature. 3 credits.
425A: A study of the works of major French writers of the first half of the 20th century. Prerequisite: FR 320.
425B: A study of contemporary French novels written since 1950 with the emphasis on current fiction. Instruction is in French. Prerequisite: FR 320.

FR/ENG 435. Studies in French Literature. 3 credits.
A study of selected works of French literature. Instruction is in English. May be repeated for credit when course content changes.

FR 440. French/English Translation. 3 credits.
An intensive course in writing and translation from and into English and French. Contemporary topics taken from various fields. Comparative terminology. Prerequisite: FR 320.

FR 446. Special Topics in French Literature. 3 credits.
Study of a particular topic in French literature. It may cover all or specific French literature genre. Course may be repeated if content varies. Prerequisite: FR 320.

FR 447. Special Topics in French Civilization and Culture. 3 credits.
Students will study a particular topic in the civilization and/or culture of Francophone countries. Course may be repeated if content varies. Prerequisite: FR 320.

FR 448. Special Topics in French Linguistics. 3 credits.
Topics could include an introduction to French sociolinguistics and psycholinguistics. Course may be repeated if content varies. Prerequisite: FR 320.

A study of French cinematography from 1930 to 1980. Emphasis given on the following directors: Renoir, Pagnol, Carné-Prévert, Cocteau, Vadim, Chabrol, Resnais, Godard, Rohmer, Lelouch, Truffaut and Malle. Instruction is in French. Counts as a culture course, not as a literature course. Prerequisite: FR 320.

FR 466. Contemporary French Cinema. 3 credits.
A study of French cinema from the 1990s until the present and its place in contemporary French culture. The course will focus on films dealing with specific moments or events in French history, as well as the evolution of the French film industry. Films to be analyzed in terms of their socio-political context and judged by their cultural perspective. Prerequisite: FR 320.

General Business

College of Business

BUS 160. Business Decision Making in Modern Society. 3 credits.
Basic business principles will be introduced to reinforce these concepts and their relationships. The course provides opportunity for applying the skills of oral and written communication to a variety of learning activities. Open to students who have not completed COB 300.

General Education

The Human Community

A “G” in bold and italics or an asterisk (*) preceding the course prefix and number indicates a course which potentially meets general education requirements.

GAFST 200. Introduction to Africana Studies. 3 credits.
An introductory survey of basic theoretical concepts to analyze the Black experience, with special focus on the general historical process common to Africa and the African Diaspora.

GAMST 200. Introduction to American Studies. 3 credits.
This interdisciplinary course will highlight the student's role in interrogating the cultural and political function of representations of America in literature, history, philosophy, religion, popular culture, music and art. Students will gain an understanding of why definitions of American identity matter and learn about the contemporary debates that inform the discipline of American Studies today. Questions about the changing role of national studies in the face of globalization are central.

GANTH 195. Cultural Anthropology. 3 credits.
An introduction to the nature of culture and its relationship to language, economics, politics, kinship and other institutions in diverse cultures. The course also provides an overview of the theories, methods and ethical responsibilities involved in the study of cultural systems and ethnographic writing.

GANTH 196. Biological Anthropology. 3 credits (B,R).
An introduction to the origins, evolution and genetic variability of humans and their relationship to nonhuman primates. Examination of the fossil record, the relationship between biology and culture and human genetics are included. Theories and methods used in the study of biological anthropology are also introduced.

http://www.jmu.edu/catalog/13
GANTH 205. Buried Cities, Lost Tribes: The Rise and Fall of Early Human Societies. 3 credits. This course takes an archaeological and comparative perspective on the origins of human institutions, including art, architecture, religion, and social and political formations as they developed and collapsed in early societies in multiple world regions, including Mesopotamia, Egypt, the Indus Valley, Mesoamerica, and the Andes. Students will explore the development and collapse of early societies in multiple world regions, including Mesopotamia, Egypt, the Indus Valley, Mesoamerica, and the Andes.

GART 200. Art in General Culture. 3 credits. An exploratory course which aids to develop a non-technical, general, cultural understanding of the arts, such as architecture, painting, sculpture, and industrial design. Emphasis is on the contemporary.

GARTH 205. Survey of World Art I: Prehistoric to Renaissance. 3 credits. An introduction to the art and architecture of the world from cave painting through European pre-Renaissance art. Includes ancient through medieval art in Europe and the Near East as well as Asian and African arts.

GARTH 206. Survey of World Art II: Renaissance to Modern. 3 credits. An introduction to the art and architecture of the world from Renaissance through Modern ages. Includes European Renaissance, Baroque, Enlightenment, 19th and 20th centuries as well as Asian and African arts.

*ASTR 120. The Solar System. 3 credits. An introductory course in astronomy, which includes the following topics: motions of celestial objects, eclipses, historical development, the nature of light, telescopes, properties and evolution of the solar system. Students may not receive credit for ASTR 120/121 and PHYS 120/121.

*ASTR 121. Stars, Galaxies and Cosmology. 3 credits. An introductory course in astronomy which includes the following topics: the Sun, stellar properties, stellar evolution, black holes, the Milky Way, galactic evolution, quasars, cosmology. Students may not receive credit for ASTR 120/121 and PHYS 120/121.

#BIO 103. Contemporary Biology (3, 0). 3 credits. An in-depth exploration of selected biological concepts, connected to current, relevant topics and emphasizing an understanding of science as a way of obtaining knowledge. Not available for major or minor credit in biology.

#BIO 114. Organisms (3, 3). 4 credits. An exploration of how diverse life forms carry out fundamental processes that sustain life, including acquiring and using essential molecules, growing and reproducing, responding to environmental stimuli, and maintaining a stable internal environment. Labs will introduce students to the scientific method in a series of investigative lab and field experiences. Biology and biotechnology majors receive registration priority in the fall.

* BIO 222. Interdisciplinary Biology for Engineering and Physical Sciences. (3, 0). 3 credits. Case studies and an issues-based approach will provide a framework to understand the science of biology, to stimulate critical thinking, and to appreciate the interdisciplinary nature of biological investigations. This interdisciplinary biology course is intended for students who have at least sophomore status and who are physical science, engineering or mathematics majors. This course is not available for credit toward the major or minor in biology or biotechnology. Prerequisite: MATH 221 or MATH 225.

* BIO 270. Human Physiology (3, 2). 4 credits. An introduction to basic physiological principles using humans as the primary organism. Physiological adaptations will be examined at the molecular level through organ systems. Intended for students in health-related fields and Cluster 3 of the General Education program. Not available for biology or biotechnology major credit. Prerequisite or corequisite: CHEM 120 or CHEM 131 or equivalent, and MATH 220 or equivalent.

#BUS 160. Business Decision Making in a Modern Society. 3 credits. This course introduces the concepts of basic technology-literacy, information retrieval via electronic and hard copy, along with critical thinking skills. Basic business principles will be introduced to reinforce these concepts and their relationships. The course provides opportunity for applying the skills of oral and written communication to a variety of learning activities. Open to students who have not completed COB 300.

*CHEM 120. Concepts of Chemistry. 3 credits. A one-semester introduction to the fundamental principles, laws and applications of chemistry. Examples relating to the health sciences are emphasized. Not available for major or minor credit in chemistry.

*CHEM 131. General Chemistry I. 3 credits. The first of a two-course general chemistry sequence for science majors. It is designed to introduce students to basic chemical concepts including atomic structure, periodic properties of the elements, nomenclature, basic stoichiometry, theories related to reactivity and bonding, and the behavior of materials. Corequisite: CHEM 131L or CHEM 135L.

*CHEM 131L. General Chemistry Laboratory. 1 credit. This laboratory course is designed to complement and supplement the CHEM 131 lecture course. The laboratory and lecture portions must be taken concurrently. Chemistry majors are to take CHEM 135L and 136L.

#GCOM 121. Fundamental Human Communication: Presentations. 3 credits. Study of human communication as a process. Overview of the principles and practices of interpersonal, small group and public communication. Emphasis on examining the role of self-concept, perception, culture, verbal and nonverbal dimensions in the communication process, using power and managing conflict, applying critical listening, practicing audience analysis within informative speech making. Public speaking required.

#GCOM 122. Fundamental Human Communication: Individual Presentations. 3 credits. Study of human communication as a process. Overview of the principles and practices of communication in a public environment. Emphasis on examining the role of self-concept, perception, culture, verbal and nonverbal dimensions in the communication process, using power and managing conflict, applying critical listening, practicing audience analysis, and constructing informative and persuasive speeches. Public speaking required.

#GCOM 123. Fundamental Human Communication: Group Presentations. 3 credits. Study of human communication as a process. Overview of the principles and practices of communication in small group and public communication contexts. Emphasis on examining the role of self-concept, perception, culture, verbal and nonverbal dimensions in the communication process, using power and managing conflict, applying critical listening, practicing audience analysis, and constructing informative and persuasive group presentations. Public speaking required.

#GCON 200. Introduction to Macroeconomics. 3 credits. Behavior of systems at the national and international levels. Topics include the methodology of economics as a social science, supply and demand, definition and measurement of important macroeconomic variables, and theoretical models of growth, inflation, interest rates, unemployment, business cycles, stabilization policy, exchange rates and the balance of payments. Not open to students who are enrolled in or who have received credit for ECON 332.

#GEN 211. Literature, Culture, Ideas. 3 credits. This course will take a thematic approach to literature by examining multiple literary texts that engage with a common course theme concerned with the human experience. Themes address cultural, political, social, religious, or philosophical aspect ideas through literature. Specific topics will vary.

#GEN 222. Genre(s). 3 credits. An examination of representative works in a literary genre, in a set of related literary subgenres, or in both a literary genre and one or more closely connected genres in other humanities disciplines.

#GEN 225. Survey of English Literature: From Beowulf to the 18th Century. 3 credits. A general survey presented chronologically.

#GEN 236. Survey of English Literature: 18th Century to Modern. 3 credits. A general survey presented chronologically.

#GEN 239. Studies in World Literature. 3 credits. Introduction to masterpieces of world literature with emphasis on non-Western literature. (May be focused regionally or topically.)

#GEN 247. Survey of American Literature: From the Beginning to the Civil War. 3 credits. A general survey presented chronologically.

#GEN 248. Survey of American Literature: From the Civil War to the Modern Period. 3 credits. A general survey presented chronologically.

#GEN 260. Survey of African-American Literature. 3 credits. Survey of literature by African-American authors from the 18th century to the present.

#GEEOG 200. Geography: The Global Dimension. 3 credits. This course promotes global understanding through the study of humans, their institutions and processes, and the resulting interactions between humans and the environment. The course will include the study of western and non-western peoples and their social, cultural, political and economic relationships.

#GEOE 102. Environment: Earth (3, 0). 3 credits. A study of geological processes causing global change and their impact on human thought. The relationship between some geological processes and...
A systematic study of earth materials and the internal and external processes that affect earth structure and landforms. Topics include the genesis/properties of rocks and minerals, plate tectonics and the agents of change that drive surface processes and landform development.

**GEOG 115. Earth Systems and Climate Change. 3 credits.** This course explores cycles, trends and abrupt events in the Earth system. Analyses of the geologic record and global climate models provide perspective for understanding paleoclimate and future climate changes, including global warming. Current hypotheses for causes of climate change are evaluated, including plate tectonics, orbital cyclicity, variations in the sun’s strength and human activities. The two re-occurring questions of this class are: What are Earth's climate stories? How do we know?

**GEOG 200. Evolutionary Systems (3, 2). 4 credits.** An investment of a theoretical principle behind evolutionary systems of all types based on mathematical modeling in chaos, complexity theory and artificial life. Students will explore religious and nonreligious approaches to these issues. Not available for major or minor credit in geology. Students may not receive credit for both *GEOG 102* and *GSCI 102.**

**GEOG 210. Applied Physical Geology. 3 credits.** A problem-based study of earth materials and the processes that affect earth structure and landforms. Topics include plate tectonics, the genesis/properties of rocks and minerals, and agents of change that drive surface processes and landform development. Quantitative problem-solving skills will be applied to cases that address 3D visualization and time-based processes, such as earth materials, solid earth and surface processes, natural hazards and engineering applications. Prerequisites: Either PHYS 140 or PHYS 240 or CHEM 131 or by permission of instructor. Corequisites: MATH 205 or MATH 220 or MATH 235 or by permission of instructor.

**GEOG 211. Introduction to Oceanography. 3 credits.** An introduction to the oceanography of coastal environments including barrier islands, estuaries and tidal marshes. The physical, geological and biochemical characteristics of coastal waters will be discussed in the context of the economic and social pressures brought to bear on these areas by an increasing global human population.

**HIST 101. World History to 1500. 3 credits.** A survey of important historical developments from prehistoric times to 1500. Emphasis is given to the rise and decline of great world civilizations and their lasting contributions to humanity.

**HIST 102. World History Since 1500. 3 credits.** A survey of important historical developments from 1500 to the present. Emphasis is given to the growth of nationalism, the development of colonialism, and to world events, problems, and conflicts of the present century.

**HIST 150. Critical Issues in Recent Global History. 3 credits.** This course examines issues in recent history as a means to introduce, develop and enhance critical thinking skills and to supplement writing, oral communication, library and computing skills objectives for General Education Cluster One. A seminar format allows for careful examination of issues in both oral and written formats. The course emphasizes the development and articulation of well-reasoned arguments in organized and grammatically acceptable prose.

**HIST 225. U.S. History. 4 credits.** A survey of U.S. history from the Colonial period to the present, emphasizing the development of American civic life, the involvement of the U.S. in world affairs and the cultural richness of the American people. This course stresses the analysis and interpretation of primary sources.

**KIN 100. Personal Wellness. 3 credits.** Emphasizes lifestyle behaviors contributing to health promotion and disease prevention. General areas affecting health status are identified. Suggestions are made as to how health-related behaviors, self-care and individual decisions contribute to health and influence dimensions of wellness.

**KIN 102. God, Meaning and Morality. 3 credits.** A study of the ways in which various communities perceive and understand the basis of knowledge, reality, meaning and purpose, ethics, and aesthetics. Students will explore religious and nonreligious approaches to these issues.

**KIN 200. Great Works. 3 credits.** An intensive examination of great literary works that focus on key issues of knowledge and reality, meaning and purpose, ethics, and aesthetics. Discussion, analysis and intensive writing are required. Texts will vary by section and instructor.

**GUM 250. Foundations of Western Culture. 3 credits.** This course is a study of the roots of our Western tradition in Greek, Roman, Medieval or Renaissance culture. Students examine the interrelationships among history and literary works; the fine arts; philosophical and religious thought and intellectual contexts. Content will vary depending on section and instructor.

**GUM 251. Modern Perspectives. 3 credits.** An interdisciplinary study within the modern period of arts and humanities. Students will examine the interrelationships among history and the arts, philosophy, religion and the intellectual ideas of the time. Topics will vary by section.

**GUM 252. Cross-Cultural Perspectives. 3 credits.** This course is a cross-disciplinary study of a non-Western culture. Students examine the ways people have responded to the human condition from different historical, religious and philosophical positions, and with their own artistic, musical and theatrical expressions. Sections, which vary by instructor, include East-Asian experiences and West-African humanities.

**ISAT 100. Environmental and Energy Sustainability. 3 credits.** This course explores scientific and technical issues important to environmental and energy sustainability. Students study fundamental chemistry and physics and then apply this knowledge to better understand air quality, water quality, and conventional and alternative energy processes. The class also explores the societal impacts of our energy choices and the potential impact we as individuals can have through personal initiative.

**ISAT 112. Environmental Issues in Science and Technology (2, 3). 4 credits.** This course integrates the study of biology, chemistry and statistics within the context of environmental issues that include ozone depletion, acid rain, global warming, waste management and biodiversity.

**ISAT 113. Biotechnology Issues in Science and Technology (2, 2). 4 credits.** This course introduces current topics in the life science technologies through lecture and laboratory exercises. Topics include advances in genetic engineering, the hierarchy of life and the rise of infectious diseases.

**ISAT 151. Topics in Applied Calculus in ISAT. 4 credits.** This course introduces the concepts of differential and integral calculus and ordinary differential equations to model real-world applications in science, business, technology and economics. This course includes a computer laboratory component emphasizing modeling and numerical methods. Course assumes familiarity with algebra and trigonometry.

**ISAT 180. Problem Solving Approaches in Science and Technology. 3 credits.** This course examines issues in modern science and technology as a means to introduce, develop and enhance critical thinking and problem solving skills. Current scientific and technological research and applications will be introduced to reinforce problem solving, instruction in systems thinking and critical inquiry. The course provides opportunities for using both oral and written communication in a variety of learning activities.

**ISAT 251. Topics in Applied Statistics in ISAT. 3 credits.** This course introduces statistical thinking – the discipline and methods for collecting, analyzing, and interpreting data for making decisions, doing science, and understanding our world. Topics covered include an introduction to data analysis methods, probability and chance, statistical reasoning and inference, and experimental design. The course includes a laboratory component emphasizing hands-on analysis of data taken from a variety of applications in ISAT. Prerequisite: Sophomore standing or permission of instructor.

**JUST 225. Justice and American Society. 4 credits.** This course introduces statistical thinking – the discipline and methods for collecting, analyzing, and interpreting data for making decisions, doing science, and understanding our world. Topics covered include an introduction to data analysis methods, probability and chance, statistical reasoning and inference, and experimental design. The course includes a laboratory component emphasizing hands-on analysis of data taken from a variety of applications in ISAT. Prerequisite: Sophomore standing or permission of instructor.

**KIN 200. Personal Wellness. 3 credits.** Emphasizes lifestyle behaviors contributing to health promotion and disease prevention. General areas affecting health status are identified. Suggestions are made as to how health-related behaviors, self-care and individual decisions contribute to health and influence dimensions of wellness.

**KIN 102. God, Meaning and Morality. 3 credits.** A study of the ways in which various communities perceive and understand the basis of knowledge, reality, meaning and purpose, ethics, and aesthetics. Students will explore religious and nonreligious approaches to these issues.

**KIN 200. Great Works. 3 credits.** An intensive examination of great literary works that focus on key issues of knowledge and reality, meaning and purpose, ethics, and aesthetics.
A survey of various world music traditions, including those of Asia, the Middle East, Africa, and to a lesser extent, the Americas. Emphasis will be placed on historical, religious, and cultural events that have shaped musical forms and styles, and the relationship between music and other art forms. Designed to increase the student's perceptual ability in music appreciation and non-Western music may also be considered. (This study will be on music from the classic, Western heritage. Folk, jazz, popular and classical music styles. An introduction to human interaction with light and sound waves. Topics include physiological and perceptual mechanisms for processing light and sound, along with connections to real-world applications (e.g., human factors and careers within vision science and audition). Includes activities designed to provide students with in-depth, hands-on experience with course topics. Techniques for judging the strengths of arguments and the probable truth of the arguments' premises will be examined. This course does not meet the philosophy requirement for the B.A. degree. An introduction to the principles and techniques of critical thinking in ethics, including analysis of arguments and fallacies, ethical theories, and applications of moral principles to moral issues. This course does not meet the philosophy requirement for the B.A. degree. The first semester of a non-calculus sequence in general physics. Topics include principles of mechanics, thermal properties of matter, wave motion and sound. A working knowledge of algebra and trigonometry is required. Energy use, sources and trends; fossil fuels, heat-work conversions, thermodynamic restrictions and electric power production; nuclear fission reactors and fusion energy; solar energy and technologies; alternative energy sources; energy storage; energy conservation; issues of waste and safety. Environmental, social and economic aspects will be discussed. Not open to ISAT majors scheduled to take ISAT 212 as part of their degree requirements. Prerequisites: One college course in science and one in mathematics. An exploration of political, social and economic issues and structures existing within and between states in the contemporary global community. Students are introduced to alternative approaches to analyzing these issues in diverse cultures and political settings. A study of topics selected to allow students to participate in mathematical research. The course provides an introduction to quantitative methodology. The nature of problems in the social sciences and human development. Emphasis will be placed on historical, religious, and cultural events and their influence on the creation and development of music. A study of moral principles and their application in understanding the world around us. Prerequisite or corequisite: One of the following: MATH 103, MATH 107, MATH 205, MATH 220, MATH 231 or MATH 235.

365 James Madison University 2013-2014 Undergraduate Catalog

http://www.jmu.edu/catalog/13
Course Descriptions 357

**GSCI 161. Science Processes.** 1 credit.
Observing, classifying, measuring, inferring, communicating, predicting and experimenting in all science disciplines. This course will introduce core science process skills for all science disciplines in a hands-on, integrated laboratory block.

**GSCI 162. The Science of the Planets.** 2 credits.
The course will focus on the Earth and its neighbors, including the formation, evolution and dynamics of the Solar System. Students will also explore the similarities and differences of different solar system bodies (stars, planets, asteroids, comets) and the possibilities for finding life elsewhere. **Prerequisite:** GSCI 161.

**GSCI 163. The Matter of Matter.** 1 credit.
This course will focus on the topic of matter: particle theory, forms, characteristics, properties, atomic theory and models, conservation of mass and energy, nuclear reactions, heat transfer within matter, chemical bonds and chemical structures.

**GSCI 164. Physical Science: Learning Through Teaching.** 2 credits.
A hands-on conversation on how technology, science and engineering come together to describe our world. The course will cover many of the traditional concepts presented in an introductory physics course. The course will treat coordinate systems and their use in describing motion, forces and energy conservation, thermodynamics (temperature, pressure, heat), light (color, ray model, wave model), waves (sound), magnetism, and electricity. The course will indirectly reinforce skills developed in other courses in the cluster including scientific tools (mathematics, graphing, diagramming, experimenting and analyzing data) and using informational resources. **Corequisite:** GSCI 163.

**GSCI 165. The Way Life Works.** 1 credit.
Patterns, energy, information, life's machinery, feedback, community and evolution. These are major themes in how life works. This course will use these themes as a backdrop for looking at the way life works.

**GSCI 110. Social Issues in a Global Context.** 3 credits.
An examination of current social issues, such as inequality and the changing workplace. Addresses questions of definition, nature, history, patterns and trends of various issues. Examines applicable theories and available research, social controls and social policy.

**GSCI 140. Microsociology: The Individual in Society.** 3 credits.
This course introduces the discipline of sociology and the subfield of microsociology. We examine the mutually constitutive relationship between the individual and society. Questions addressed include: How does society influence how we think, feel, believe, act, and interact with others? What influences the self, social identity, shared social meanings, social roles, and one's position in society? How do we, as individuals and as members of social groups, recreate, contest, and change society?

**GTHEA 210. Introduction to Theatre.** 3 credits.
Study of the theatre as an art form. Emphasis on introducing students to a broad spectrum of theatrical activity and opinion. Consideration of the components that comprise a theatre event including acting, directing, design, costume, lighting and playwriting.

**GWRTC 103. Critical Reading and Writing.** 3 credits.
Fosters reflective, critical reading, writing, and research in public discourse, culture, humanities, technology, and science. Challenges students to consider cross-disciplinary modes of inquiry through multiple genres with an attention to enlightened, global citizenship. Emphasizes revising for rhetorical effectiveness. **GWRTC 103** fulfills the General Education Cluster One writing requirement and is a prerequisite for all WRTC courses numbered 200 or above.

**Geographic Science**

**Department of Integrated Science and Technology**

**GEOG 161. Geospatial Tools and Techniques.** 1-6 credits, variable.
An introduction to the use of geospatial tools, such as geographic information systems (GIS), global positioning systems (GPS) and remote sensing, applied to a variety of areas, including cultural geography, environmental science, ecology, geology and public planning.

**GEOG 200. Geography: The Global Dimension.** 3 credits.
This course promotes global understanding through the study of humans, their institutions and processes, and the resulting interactions between humans and the environment. The course will include the study of Western and non-Western peoples and their social, cultural, political and economic relationships.

**GEOG 210. Physical Geography (2, 2).** 4 credits.
This introductory course is an examination of systems and processes that influence patterns of Earth's atmosphere, biotic communities, soils and landforms at multiple spatial and temporal scales. Included are classroom and laboratory experiences that are geared toward investigating interrelationships among atmospheric conditions, Earth's natural surface characteristics and human-induced modifications of Earth's features. **Prerequisites:** GEOG 215. Geospatial Tools I – Cartography and GIS. 3 credits.

An introduction to cartography and geographic information systems (GIS). Basic concepts will be illustrated with examples from a variety of application areas, including cultural geography, environmental science, land use, and planning and business.

**GEOG 215. Geospatial Tools I – Cartography and GIS.** 3 credits.

An introduction to remote sensing, global positioning systems (GPS) and computer fundamentals in geographic science. Basic concepts will be illustrated with practical applications, including hands-on work collecting data with GPS units and exploring sensing images from a variety of different instruments. Environmental applications will be featured.

**GEOG 230. Spatial Thinking and Problem Solving.** 3 credits.
Introduction to the critical thinking skills associated with problems inherent with spatial components. Identification of the spatial elements of a given problem, the data requirements for addressing that problem, collections/ acquisition, and organization of data and use of geographic information systems to explore spatial patterns relevant to the problem of interest. **Prerequisites:** GEOG 215, GEOG 216 and an introductory course in statistics (GISAT 251 or equivalent) or permission of the instructor.

**GEOG 260. Selected Topics in Geography.** 3 credits.
Exploration of geographic topics, tools or techniques of current interest. Can be repeated as course content changes.

**GEOG 280. Human Geography: The Cultural Landscape.** 3 credits.
The course themes are human culture, cultural variations over the face of the Earth and how these variations are related to selected global issues. Topics covered include world demographics, world religions and languages, patterns of human migration, political systems and human conflict, agricultural systems, and impact on the physical world.

**GEOG 290. Human Interactions with the Physical Environment.** 3 credits.
The course examines human-environment interactions from a holistic point of view. It incorporates geographic perspectives of these interactions, which include political, cultural, social, economic and ethical factors that influence how people perceive, impact and manage the natural world. The course will emphasize geographic theories of resource use, humans as part of the landscape and human vulnerability to environmental changes.

**GEOG 298. Human Geography: The Cultural Landscape.** 3 credits.
The course themes are human culture, cultural variations over the face of the Earth and how these variations are related to selected global issues. Topics covered include world demographics, world religions and languages, patterns of human migration, political systems and human conflict, agricultural systems, and impact on the physical world.

**GEOG 300. Population Geography.** 3 credits.
An introduction to population measurement, sources of population data and modern population problems. Topics include distribution, the changing age structure and migration issues affecting the U.S. At the global scale, topics include distribution, global migration patterns, the refugee crisis and prospects for feeding the rapidly increasing human population.

**GEOG 305. History and Philosophy of Geography.** 3 credits.
Topics from the classical period to the modern period include 20th century theories and paradigm shifts involving cultural geography, physical geography, human-environment traditions, regional geographies and modeling. Diverse philosophies such as quantitative/postivist, qualitative/humanistic social theory and GIS are viewed for their contributions to the discipline of geography. **Prerequisite:** Junior standing or permission of the instructor.

**GEOG/GEOL 310. Environmental Issues.** 1-4 repeatable credits, no limit.
Courses cover environmental issues such as air pollution, forest and wildlife management, water, resource management, soils and land use, and energy and the environment (among other topics). Courses examine the interface between humans and environmental systems while addressing the impact of social, economic and political systems and activities on the environment. May be repeated as course content changes.

**GEOG 311. Endangered Environments.** 3 credits.
In this course an investigation is made of a selected number of environmental problem areas around the world. Some examples include the temperate rainforest of Valdivia, South America, the tropical rainforests of Borneo and the Araf Sea of Eastern Europe. In the course, students will explore physical aspects of each environment and explore human impact and potential solutions to the problems.
