The College of Integrated Science and Technology (CISAT) is comprised of the Computer Science, Communication Sciences and Disorders, Graduate Psychology, Health Sciences, Integrated Science and Technology, Kinesiology, Nursing, Psychology, and Social Work academic departments. CISAT is a college of professional programs that use science and technology to enhance the quality of life in the modern world. Academic programs within the College seek to promote interdisciplinary education and teaming; the integration of real world experiences (including internships, field placements and active student involvement in research) in the academic programs; the integration of the natural sciences, social sciences, humanities and information technology throughout the curriculum; and collaboration across departments and disciplines both within the College and throughout the academic division. The work of the College is enhanced through its strong and extensive outreach programs.

Mission

The primary mission of the college is to educate students in the areas of the applied sciences, health, technology and human services, as well as to prepare them to enter professions or to undertake advanced study.

Administrative Units and Contact Information

Communication Sciences and Disorders
