SUBMISSION GUIDELINES:

**Article length:** 1,000–2,000 words, submitted in digital format (i.e., Microsoft Word). Research & Development articles can be up to 3,000 words.

**Photos/figures:** Please submit one photo or figure for every 500 words in your article. Photo file size should be at least 500 KB. Submit all graphics by email with captions and credits. When submitting images, you are giving The Journal permission to use the images, with proper credit, in any media or publication under CISR’s control now and in the future.

**Contact information/bio:** Articles must contain each author’s name and full contact information at the end of the article (i.e., phone, email and mailing address). Please include a headshot photo and biography (up to 60 words) of each author.

Submit all materials to:
Editor-in-Chief, The Journal of ERW and Mine Action
Center for International Stabilization and Recovery
James Madison University,
800 S. Main Street, MSC 4902
Harrisonburg, VA 22807 / USA
Phone: +1 540 568 2503
Email: cisreditor@gmail.com

The Journal of ERW and Mine Action is sponsored by:

*Deadline: 1 October 2014
Publication: Spring 2015

*Submissions for issue 19.1 are due by 1 October 2014. However, because of limited space, we strongly encourage authors to submit articles to The Journal before the deadline.

FOCUS: Vietnam

The Focus section of The Journal looks at issues affecting a particular country or region. For this issue, The Journal requests articles on explosive remanants of war (ERW) clearance, stockpile security, survivor assistance, and related national programs and legislation in Vietnam. What is the state of clearance efforts in Vietnam? What is the national strategy to move ahead? How has Vietnam’s 2010 Disability Law helped survivors? What barriers affect its implementation? What is the state of survivor assistance in Vietnam?

FEATURE: Environmental & Cultural Considerations in Demining

The Feature section of The Journal analyzes issues or studies challenges within the scope of post-conflict recovery and mine/ERW-action. For this issue, The Journal welcomes articles on the environmental and cultural effects of clearance operations, as well as on best practices and lessons learned. Mine and ERW clearance can have detrimental effects on sensitive ecosystems or at cultural heritage sites. What environmental and archeological considerations must be taken into account in clearance operations? What legal issues should be discussed, especially when more than one country claims a cultural site? What considerations must be taken into account when clearing areas of known cultural heritage or when artifacts are uncovered in areas not known to contain ruins? How does underwater demining affect ocean ecosystems and coral reefs? How can demining be accomplished in fragile environments?

Notes from the Field: This section of The Journal features articles, case studies, and experiences by practitioners and subject-matter experts. Notes from the Field accepts articles on a variety of subjects on a rolling basis.

Research and Development: This is a peer-reviewed technical section of The Journal. Scientific and technical articles on current trends and developments in the field of mine action and conventional weapons destruction will be considered on a rolling basis.
