Issue 21.2
Articles due 1 February 2017
Publication: July 2017

The Journal invites government bodies, nongovernmental organizations, military personnel, researchers, academics and industry experts to contribute their articles or case studies. We are actively looking for theoretical and practice-based non-promotional contributions.

SPOTLIGHT
Southeast Asia
How are international and national mine action operators in Southeast Asia addressing threats? What has changed in the way data is collected and analyzed? What lessons learned can be shared with the broader CWD community?

FEATURE
Evolving Nature of Survey
As the number one cause of military casualties, IEDs are now also becoming one of the greatest threats to civilians. How are traditional humanitarian conventional weapons destruction (CWD) programs dealing with the increasing prevalence of improvised explosive devices (IED) and pressure plate IEDs? What is the nexus between traditional CWD programs and military counter-IED programs? What can organizations learn from the military’s experience with these weapons?

IN EVERY ISSUE
Field Notes: This section of The Journal features articles, case studies, and experiences by practitioners and subject-matter experts. Field Notes accepts articles on a variety of subjects on a rolling basis.

Research and Development: This is a peer-reviewed technical section of The Journal. Scientific and technical articles on current trends and developments in the field of mine action and conventional weapons destruction will be considered on a rolling basis.
