The Journal of ERW and Mine Action is a professional trade journal for the humanitarian mine-action and combatant-casualty-of-war community. It is a forum for landmine and ERW clearance best practices and methodologies, strategic planning, mine-risk education and survivors’ assistance.

The Journal’s Editorial Board reviews all articles for content and quality, and it reserves the right to edit accepted articles for readability and space, and reject articles at will. Manuscripts and photos will not be returned unless otherwise requested.

The views expressed in The Journal of ERW and Mine Action are those of the authors and do not necessarily reflect the views of the Center for International Stabilization and Recovery, the Mine Action Information Center, James Madison University, the U.S. Department of State or the U.S. Army Humanitarian Demining Program.

Letters of submission articles to The Journal are expected to do so in good faith and are solely responsible for the content therein, including the accuracy of all information and correct attribution for quotations and citations.

The Journal’s editorial staff prefers to receive manuscripts and all materials in digital format (Word or similar). Graphics and photos should be sent in PNG or TIFF format from the manuscript file; please do not embed them in the document.

Please note that all rights to content, including photographs, published in The Journal are reserved. Reprint permission and written approval are required before another source or publication may use the content. For more details please visit our website or contact the editor-in-chief.

Dear Readers,

Since Ken Rutherford became the Director of the Center for International Stabilization and Recovery in February 2010, the journal team and the rest of the CISR staff have been blessed with his insight, energy and creativity. He is a dynamic leader whom we admire, and he is well respected throughout the world. Many of you know him as co-founder of Landmine Survivors Network (later Survivor Corps, now defunct), a landmine survivors’ advocacy and support group. While Dr. Rutherford continues as a personal champion of survivors’ and other disability rights, as CISR’s Director, he is also broadening and deepening the Center’s vision and mission to develop, implement and deliver global programs that make a difference, and publishing the premier information source for the humanitarian mine-action sector, this journal.

The Journal of ERW and Mine Action is focused on programming. Yet, we have recently received an increasing number of articles promoting various issues—often entirely outside of The Journal’s scope (such as the ongoing Arms Trade Treaty negotiations). It is time to clearly state what topics we will publish and what articles we are interested in receiving.

The Journal is a professional trade journal for the HMA and ERW community. The first two-thirds of the publication is devoted to topics that interest a wide variety of HMA and ERW industry people—field, management, programming, training, academic and government personnel. The last third of The Journal focuses on new or emerging technologies and scientific studies that contribute to more effectively expanding the discussion regarding innovative ideas to clear and/or neutralize mines and ERW.

The Journal is a forum for HMA and ERW clearance best practices and methodologies, strategic planning, mine-risk education and survivors’ assistance. We love case studies discussing projects/programs what happened, who was involved and supported the project, successes, failures and ideas for improvements. By highlighting the good work you do in the world, we help readers learn, grow, innovate and do more good. Kindly remember, however, that without donors, you would be unable to do as much for the world, so please acknowledge their support in your articles.

We welcome case studies discussing projects/programs what happened, who was involved and supported the project, successes, failures and ideas for improvements. By highlighting the good work you do in the world, we help readers learn, grow, innovate and do more good. Kindly remember, however, that without donors, you would be unable to do as much for the world, so please acknowledge their support in your articles.

In addition, we welcome your contributions to our website forum and commenting features. I invite you to use these tools to tell the world what you think.
