

Evaluation of Staff

The NAEYC Classroom Observation Checklist and the YCP goals are used to guide the coordinator's evaluation of teaching staff. As directed in the JMU Faculty Handbook, new employees are informed of these instruments and an initial evaluation is conducted at the beginning of the faculty member's second semester. All professional teacher staff are evaluated at the conclusion of the academic year.

Student staff are evaluated at mid-semester and at the end of their semester of work in the program.

Evaluation of the coordinator is according to procedures identified in the JMU Faculty Handbook.
