

Orientation of Staff

New YCP employees are given a very personal orientation to the program. Information in the Staff Orientation Checklist, the YCP Operation Manual, the YCP Handbook for Families, and YCP Student Staff Handbook is included, as is a personal, detailed tour of the YCP and College of Education facilities, and the opportunity to meet faculty and administrative staff.

During their initial classes each semester, student staff members are involved in orientation to the Young Children's Program. They receive the YCP Student Staff Handbook and meet with the YCP Coordinator and teachers for an in-depth introduction to the program and their roles. Their accompanying coursework in early childhood curriculum and child development supports their professional growth as active participants in the program.
