

Comparison Outlook OWA 2007 and OWA Light 2007

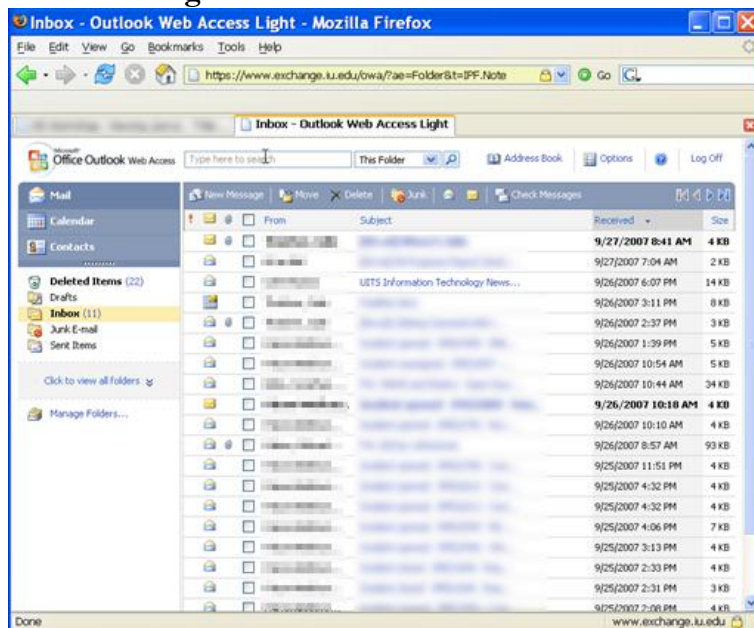

OWA 2007

Screenshot of the OWA Premium interface

The Premium interface comes closest to replicating the actual Microsoft Office Outlook experience, with some right-click functionality and access to the full feature set.

OWA 2007 Light

Screenshot of the OWA Light interface

The Light interface is faster and is available on a wide variety of browsers and operating systems.

Features missing in Light interface

The following features of OWA Premium are **not** present in Light:

- The Tasks module

- Task-specific properties: Only the text of the task items can be read through OWA Light.
- Search for mail items: OWA Light users can search only Contacts and Address Book.
- Reminders
- HTML composing of messages: OWA Light users get only plain text textboxes with no editing or formatting options.
- Flags and Categories
- Weekly view in Calendar: OWA Light shows the daily view only.
- Free/Busy grid in Appointment/Meeting Scheduling Assistant: OWA Light users get only "Suggested Times".
- Print
- Spell Check
- Conversation View
- Account Quota information
- Recover Deleted Items
- Calendar month view
- Add/edit distribution lists
- Public Folder access
- S/MIME features
- Add/edit rules
-
