ATV Expenditure Credit Sample

Allocate costs among departments

A department (900002) supplies copy paper and the use of a copier to another department (900025). Based on agreement between departmental managers, the costs are to be split 60% to department 900002 and 40% to department 9000025. An ATV is prepared to share the cost for this service. This is an example of an expenditure credit to allocate shared costs. In this example, department 900002 has purchased paper (131200) for \$100 and paid for copier lease (153400) for \$200 during July.
