

Bif Window Zoom

A series of three zooms moving deeper and deeper into the bifurcation diagram. There is distortion at each zoom because the length-width axes are not the same each time. Notice the self-similarity; each zoom resembles the last, even though magnification increases. Also, there is always more detail. This zooming can go on indefinitely.

Red box of 2 stretched horizontally and enlarged in 3

Red box of 3 stretched vertically in 4, but values as 3.
