“All the City’s a Stage: Theater and the Formation of Race, Class, Gender and Nation, in Buenos Aires, Argentina, 1860-1920” [tentative title]

This book is an urban, cultural, and social history of turn-of-the-century Buenos Aires, Argentina. It uses theater as a point of inflection to understand the fissures and transformations in the modernization of the nation, including its democratization, during an era of massive change wrought by industrialization, modernization, and immigration. The time frame witnesses the emergence of a middle-class identity, and the integration of women into the public sphere. This cultural history draws from a wide range of sources, including city council reports, newspapers, magazines, a reading of over fifty popular plays, as well as archival materials to show how immigrants, creole or native-born Argentines, and the emerging middle classes processed social and political change as well as how the non-elite shaped the modern nation through their leisure-time activities.

Under contract with Pittsburgh University Press (Latin American Studies Series) for Spring 2024.
