16. **Mathematics:** Uses mathematical reasoning to accomplish tasks

Objective: The student will count objects while completing a task.

Activities:

1. Ask students to count and put away three toys. Teacher can specify: count and put away three cars, two blocks, four books.
2. Ask student to draw three lines, color the four circles, and trace the two boxes. After the student is finished help him/her touch each object while counting it.
3. Ask student to jump and count three times, count stairs while walking up or down them, or put on two shoes. Ask students in the classroom to create a line of three students; have two students at each table stand up, or make a circle of four students.
