Mission Statement
The JMU College of Business aspires to be one of the best undergraduate programs in the United States. Its mission is to emphasize excellence and continuous improvement in undergraduate learning and to provide quality niche graduate programs.

The college's undergraduate programs are based on solid foundations in general education and an integrated business core curriculum. Beyond these foundations, the college offers students a wide variety of programs that emphasize theory, application, and experiential learning in a business discipline. It encourages faculty to take an active role in innovative curriculum development and assessment designed to improve the educational experience.

In support of its emphasis on quality education, the college strives to enhance faculty involvement in theoretical and applied research and in service activities that contribute to the college, the university, the community, as well as relevant professional associations at the local, regional, national and international levels. To strengthen its ties to the business community, the college supports several external outreach centers.

Overview
The College of Business offers baccalaureate degree programs with the following nine academic majors: accounting, information technology, economics, finance, hospitality and tourism management, international business, management, marketing, and quantitative finance. Each of the baccalaureate degree programs leading to the B.B.A. degree has essentially the same general structure:

- General Education component
- B.B.A. core requirement
- Major component
- Non-business electives component

Graduate-level programs offered by the college lead to the M.B.A. degree or the M.S.A. degree. All academic degree programs offered by the College of Business are accredited by AACSB International - The Association to Advance Collegiate Schools of Business.

Admission to the College of Business
A student desiring to major in any B.B.A. program in the College of Business must formally apply for admission to the College. The application may be submitted upon completion of 45 credit hours and must meet the official calendar deadline announced by the CoB Academic Services Center each year for fall, spring, or summer admission. Applications received after the deadline for each application period (i.e., fall, spring, or summer) will not be considered. Late applicants will be required to resubmit their application prior to the next deadline.

Admission to the College of Business is competitive. At a minimum, a student must have completed 56 credit hours, earned a cumulative grade point average of 2.500 (rounding is not used) in all courses taken at JMU, and must have completed all 100- and 200-level B.B.A. core courses (described below) and their prerequisites. Meeting these minimum requirements, however, does not guarantee admission.

Final admission decisions are based upon resources. The total number of students admitted will be no greater than can be effectively supported with available instructional resources.

Admission permits a student to enroll in COB 300 and to be formally admitted to a major. However, some majors in the College of Business may impose standards that exceed those of the College as a whole. A student must meet both the College of Business requirements and the requirements of the major in which he or she seeks to enroll.

The above requirements do not pertain to students who are enrolled in the B.A. or B.S. in economics program or to those enrolled in the B.S. in quantitative finance program.

Lower-Level B.B.A. Requirements
During their freshman and sophomore years, business majors concentrate on building an academic foundation upon which they will base more in-depth junior-year studies. This foundation includes both lower-division B.B.A. core requirements and the major part of the university general education program.

B.B.A. Core
B.B.A. majors must complete all 100- and 200-level core requirements and meet all of the criteria under "Admission to the College of Business" to be eligible for junior-level business course work. Consequently, class schedules for the four-semester sequence covering the freshman and sophomore years must be planned accordingly.

The following lower-division courses must be completed prior to enrolling in 300-level courses:
Upper-Level B.B.A. Requirements

Upper-division core courses required of all B.B.A. majors may not be taken until all lower-division B.B.A. core courses have been completed and the student has been admitted to the College of Business. The upper-division courses are the following:

1. COB 300A. Integrated Functional Systems: Management (3 credits)
2. COB 300B. Integrated Functional Systems: Finance (3 credits)
3. COB 300C. Integrated Functional Systems: Operations (3 credits)
4. COB 300D. Integrated Functional Systems: Marketing (3 credits)
5. COB 487. Strategic Management (3 credits)

1 Students must take all four COB 300 courses during the same semester.
2 COB 487 must be taken during the senior year.

Refer to the appropriate sections of this catalog for specific degree requirements for the individual majors in the College of Business.

Non-Business Electives

The B.B.A. degree requires a minimum of 120 credit hours of undergraduate course work. Fifty percent of this work, 60 credit hours, must be taken outside of the College of Business. In counting the 60 credit hours of non-business courses, B.B.A. students may include all hours taken in general education (usually 41), up to a total of nine hours in Economics (note that GECON courses must be counted as Economics) and three hours of COB 191. The remaining hours, to bring the total to 60, must be taken from any department outside the College of Business. Students should carefully select these non-business electives to help them gain additional knowledge and expertise for their careers and personal lives.

Declaration of a Business Major or Minor

JMU students seeking to change their current major to one in the College of Business must be in “good standing,” meaning they must have a cumulative grade point average of 2.0 or higher on the date they submit a “Change or Declaration of Major” form. This policy affects students desiring to change their major to one of the following: accounting, information technology, economics (B.B.A. degree only), finance, hospitality and tourism management, international business, management, and marketing. This policy also applies to non-College of Business students desiring to declare one of the following minors: economics, finance, management science and retail merchandising. The policy does not apply to freshmen or transfer students during their first semester at JMU.

This policy does not supersede the 2.5 cumulative grade point average stipulated for enrollment in COB 300 or junior-level courses in College of Business major programs, nor does it supersede admission requirements for specific academic programs in the College of Business.

Business as a Second Major

A student enrolled in any JMU degree program other than the B.B.A. program who wishes to select a B.B.A. major field (i.e., accounting, information technology, economics, finance, hospitality and tourism management, international business, management, or marketing) as a second major must complete the following courses:

1. All B.B.A. core courses, as shown above; and
2. All requirements specific to the major selected.

Transfer Credit Policy

AACSB International-accredited colleges of business generally allow only a limited amount of business course work prior to the junior year. Because of that restriction, accredited colleges are required to detail a process for accepting transfer courses. To meet that requirement, the JMU College of Business has established the following transfer credit policy: The College of Business normally does not award transfer credit for courses that were taken at the 100- or 200-level if those courses are offered at the 300- or 400-
level at JMU. If a transfer student wishes to receive credit for such a course, the following steps must be taken:

1. The student must present the course syllabus and appropriate course materials to the director of the relevant academic program in the JMU College of Business.
2. The program director must determine that the course covers material similar to that covered at JMU. If the material is not deemed sufficiently similar, then the student must take the course at JMU. This decision is final and may not be appealed.
3. If the material is considered sufficiently similar, the student may take a comprehensive examination covering the JMU course material and must pass it with at least a grade of 70 percent, or the student may choose to complete the course itself.
4. If the student passes the comprehensive examination, the program director will report that result to the College of Business Academic Services Center, which will prepare a course substitution form.

Additionally, each program in the College of Business will accept no more than two courses for transfer credit toward the major. The major is defined as the course work required by a major field of study in addition to the lower- and upper-level B.B.A. core courses. For a course to be considered for acceptance in the student’s major, it must have been completed in an AACSB International-accredited business program at a four-year university. Certain majors within the College of Business may have more restrictive policies on transfer credit. Those policies are explained in the following sections devoted to the individual majors.

The JMU College of Business prescribes that at least fifty percent of the business credit hours required for the B.B.A. degree be earned at JMU. Specifically, this statement means that no fewer than 28 of the required credit hours in the College of Business be completed at JMU. Required credit hours include the B.B.A. Core and the courses required for the major. The following B.B.A. core courses do not count toward meeting this requirement: COB 191, ECON 201, and GECON 200.

Individual programs in the College of Business may have transfer credit limitations in addition to this overall requirement. Please refer to the specific academic major following this section.

Internships for Business Majors

Students with majors in the College of Business are encouraged to participate in at least one formal business internship prior to graduation. Most commonly, students serve as interns in business organizations during the summer between their junior and senior years, but internships are not restricted to that period of time.

In some cases, students may receive academic credit for internships. In such cases, the maximum amount of credit that may be obtained is three credit hours. The minimum requirements for such academic credit are the following:

- The student must have at least junior standing.
- The internship must be approved in advance by the Faculty Internship Coordinator and the Program Director in the student’s major, and the student must be registered for the class credit during the internship experience.
- The intern must complete a minimum of 200 hours of work experience.
- The intern’s immediate supervisor must submit at least one performance evaluation to the Faculty Internship Coordinator.
- The intern must submit a final written paper and participate in an exit interview with the Faculty Internship Coordinator.
- Internships in more than one program are permitted. However, double counting (i.e., receiving credit for a single internship experience in more than one major) is not permitted.

Some majors in the College of Business may have higher requirements than these minimum standards.

Computer Competency Requirements

All students majoring in the College of Business must be able to use current information technology tools and demonstrate the ability to learn new tools as part of their preparation for the professional world. Many business courses help students develop basic information technology skills in such areas as spreadsheet analysis, database management, presentation software and web page development. However, course work alone cannot provide students with the level of proficiency needed by employers and graduate schools. Consequently, students must take personal responsibility for developing their skills beyond the basics taught in various classes.

To facilitate student progress, the College of Business requires every business major to have continuing access to two resources: a book on using the Microsoft Excel spreadsheet and a book on using the Microsoft Access database. Students are expected to acquire these books as sophomores and use them throughout their programs of study.
Personal Computers

Many courses in the JMU business curriculum make extensive use of computers and software. Students are given hands-on experience in using computer technology to solve complex business problems.

Computer labs are conveniently located in several academic buildings and residence halls. These labs are intended for quick, short-term use by students as an adjunct to their class time. Relying solely on the labs for lengthy or complex assignments, however, is unrealistic; therefore, students should make arrangements to have their own personal computers outside the university-provided labs.

Since computers are essential in today’s business environment, students with majors in the College of Business are strongly encouraged to purchase their own personal computers. Computers are available at discount prices from the university bookstore; however, computers meeting the recommended configuration may be purchased from many retail and mail-order sources. Various vendors also provide rental and leasing programs. Because technology is continually advancing, students should consult the College of Business Web site at http://www.jmu.edu/computing/purchase/dept.shtml to obtain the latest specifications on recommended minimum hardware configuration.

European Business Concentration

The European Business Concentration can be completed by taking COB 300A-D (Integrated Functional Systems: Management, Finance, Operations, Marketing - 12 credit hours) and COB 301 (European Integration, Culture and History - 3 credit hours) in Belgium as part of the Semester in Belgium program. These two courses will be taught in the context of the European Union, and, as a part of the curriculum, students will visit and study European businesses (e.g., the London Stock Exchange, businesses in the Port of Antwerp) and the institutions that comprise the European Union (e.g., the Council of Europe, the European Parliament). In addition, students will visit business, governmental and cultural institutions in five countries: Belgium, France, Holland, Luxembourg and England.

Students in this concentration will:

- acquire an in-depth understanding of the European business environment;
- learn about the institutions of the European Union;
- gain an understanding of the issues surrounding economic and monetary union;
- apply the integrated functional systems to the European market; and
- understand the role of culture in conducting business in Europe.

This concentration is only available to students who complete COB 300 and COB 301 with the Semester in Belgium program.
