I. Membership, duties, and procedures for the TTPAC and the RTAPAC

I.A. Membership

I.A.1. Membership of TTPAC for evaluation of tenure-track faculty

The Tenure-Track Economics Personnel Advisory Committee (TTPAC) will evaluate tenure-track faculty for the midpoint review, tenure applications, and applications for promotion. The TTPAC shall consist of tenured members of the department who agree to abide by the procedures detailed in this document. Non-tenured faculty members are not involved in discussions or votes regarding evaluation of tenure-track faculty. Only TTPAC members that have achieved promotion to Professor will be involved in the evaluation of faculty members seeking promotion to Professor. In a TTPAC meeting prior to the first day of Fall classes, a chair will be selected to serve in a leadership capacity for the upcoming academic year. Candidates for chair can be self-nominated or nominated by other full-time department members, and the position is decided by a majority vote of the TTPAC members. For each department in the College, the Dean and AUH select a tenured department member to serve on the College of Business PAC. Normally this is the chair of the TTPAC and RTAPAC, although the Dean and AUH can select a different department member as needed.

I.A.2. Membership of RTAPAC for evaluation of RTA (Renewable Term Appointment) faculty

The RTA Personnel Advisory Committee (RTAPAC) will evaluate RTA candidates for promotion in the areas of teaching, scholarship/professional practice, and service. RTAPAC membership will differ from that used for evaluating tenure-track faculty. The RTAPAC shall consist of tenured members of the department and all RTA faculty who are senior lecturers or principal lecturers. Assistant professors who are untenured and lecturers who have not been promoted are not involved in discussions or votes regarding RTA candidates for promotion. The TTPAC chair will also serve as the RTAPAC chair.

I.B. Duties

The chair of the TTPAC and RTAPAC will be responsible for conducting meetings in a professional manner and in such a way as to facilitate wide participation by the members of the TTPAC and RTAPAC in the discussion of issues. Ideally, the chair should be a full professor. The chair must be a full professor during any academic year when there are applications for promotion to full professor. The chair is a voting member of the TTPAC and RTAPAC. Any responsibilities of the chair may be delegated at the discretion of the chair.

I.B.1. TTPAC duties for evaluation of tenure-track faculty

The TTPAC will conduct a third-year evaluation of all tenure-track faculty in the spring of the faculty member’s third year at JMU. The faculty member will submit to the TTPAC (by March 1st of the third year) a report on their scholarship and service activity in addition to copies of course syllabi, examinations, student evaluations, a statement of the faculty member’s teaching philosophy, and other materials related to teaching (including any materials requested by the TTPAC). The faculty member’s progress toward tenure and promotion with respect to teaching, scholarly achievement and professional qualifications, and service will be evaluated and reported to the faculty member in the form of a letter (by April 15th). A copy of this letter will be placed in the faculty member’s permanent file. Details on expectations and indicators of satisfactory progress are described in Section IV below.
The TTPAC will conduct an evaluation of teaching, scholarly achievement & professional qualifications, and service for tenure-track applicants for tenure and promotion. The TTPAC will rate the applicant as being Excellent, Satisfactory, or Unsatisfactory in each of these three areas. Details on criteria for ratings are described in Section II below. A letter explaining the rationale for the TTPAC’s ratings will be provided to the applicant, AUH, and Dean according to the procedures and timelines indicated in the Faculty Handbook.

I.B.2. RTAPAC duties for evaluation of RTA faculty

During an RTA faculty member’s third year at JMU, the RTAPAC will provide feedback for RTA faculty development purposes. For these purposes, RTA faculty will submit to the RTAPAC a dossier summarizing their activities and accomplishments in the areas of teaching, scholarly achievement & professional qualifications, and service since beginning employment at JMU. This dossier should be submitted to the RTAPAC chair by February 1 and should include a curriculum vitae and supporting documentation as requested by the RTAPAC. The RTAPAC may meet with the AUH to discuss the candidate.

The RTAPAC will conduct an evaluation of teaching, scholarly achievement & professional qualifications, and service for RTA applicants for promotion to senior lecturer or principal lecturer. The RTAPAC will rate the applicant as being Excellent, Satisfactory, or Unsatisfactory in each of these three areas. Details on criteria for ratings are described in Section III below. A letter addressed to the dean of the College of Business, explaining the rationale for the RTAPAC’s ratings, will be provided to the dean with copies to the AUH and candidate, according to the procedures and timelines indicated in the Faculty Handbook.

I.B.3. Expectations for members of the TTPAC and RTAPAC and revocation of membership

Each member of the TTPAC or RTAPAC is responsible for devoting thorough attention to materials that have been submitted for their review. The TTPAC may by majority vote of the committee as a whole remove a member of the TTPAC or a member of the RTAPAC for dereliction of this responsibility or for violation of the rules in this document. Any such action must be approved by the AUH and the dean.

I.C. Procedures

I.C.1. Amendments

Any proposal to modify this document must be submitted to the full-time departmental faculty. A proposal to amend will be approved when there are affirmative votes from at least a majority of the fulltime, tenure-track or tenured members of the department (excluding administrators and persons on leave). Friendly amendments to a written proposal to modify this document may be voted upon at the meeting to consider the proposal. Other amendments will be voted on no sooner than one week later. Absentee votes on written proposals will be accepted and can be emailed to the TTPAC chair prior to the meeting to consider the proposal. Amendment proposals that have been approved by a majority of fulltime, tenure-track and tenured members of the department will be sent to the AUH, who can choose to accept the amendment, reject the amendment, or request that the amendment be revised. Any AUH accepted amendment will then be sent to the Dean who can accept or reject the amendment.

I.C.2. Timelines

The TTPAC and RTAPAC will follow all timelines indicated by the Faculty Handbook. The standard timeframe for a midpoint review is a faculty member’s third year, but if a faculty member has negotiated a different tenure review timeframe, then the midpoint review will be adjusted accordingly.
Tenure-track midpoint review packets are due to the TTPAC by March 1 of the midpoint review year, and the TTPAC’s tenure-track midpoint review letter will be provided to the faculty member and AUH by April 15. Tenure and promotion applications are due to be submitted by the Faculty Handbook deadline of October 1, and the letters from the TTPAC or RTAPAC concerning a tenure and/or promotion application will be provided to the faculty member, AUH, and Dean by November 15. RTA third-year feedback review packets are due to the RTAPAC by February 1, and the RTAPAC’s letter concerning an RTA third-year review will be provided to the faculty member and AUH by April 15.

I.C.3. Appeals

The Economics TTPAC and RTAPAC will not be responsible for responding to appeals of any sort.

I.C.4. Relationship between AUH evaluations and evaluations by the TTPAC and RTAPAC

As described in the Faculty Handbook, the annual evaluation process (conducted by the AUH) is separate and independent from all evaluations by the TTPAC or RTAPAC, including evaluations of applicants for promotion and tenure. A succession of satisfactory or excellent annual evaluations in teaching, scholarship or service is not, in and of itself, conclusive evidence that the faculty member’s work is satisfactory or excellent for purposes of application for tenure and/or promotion. However, for all TTPAC and RTAPAC evaluations, the TTPAC/RTAPAC and AUH will engage in mutual exchange of useful information. The AUH is invited to share input and answer questions, and the AUH is invited to ask for input, for the benefit of each party’s independent evaluations. The procedures and criteria for tenure and promotion in the Department of Economics are described in sections II and III below.

I.C.5. Voting Process

To determine performance levels (Excellent/Satisfactory/Unsatisfactory) for tenure and promotion applications, each TTPAC member or RTAPAC member will cast a confidential paper ballot indicating their own individual rating of the applicant’s teaching, scholarly achievement and professional qualifications, and service. Ballots will be distributed at the meeting where the applicant’s record is discussed. Ballots must be turned in to the departmental administrative assistant no later than the date chosen by the TTPAC/RTPAC chair and announced at the meeting. On the ballot due date, the chair and the departmental administrative assistant will each independently tally the votes. A strict majority of votes for a particular performance level (e.g. Excellent) in a particular area (e.g. Teaching) will determine the TTPAC/RTAPAC rating for the applicant in that area.

I.C.6. Letter to explain evaluations by the TTPAC and RTAPAC

As indicated by the faculty handbook, the TTPAC and RTAPAC will justify their recommendations in writing. Each such letter will be drafted by the chair (or by the chair and delegated members of the TTPAC or RTAPAC). All members will then be given the chance to provide feedback that the chair may use to revise and write the final letter containing the recommendation.

I.C.7. Informal consultations

Any department member is welcome to schedule an informal meeting with the TTPAC/RTAPAC chair or with the entire TTPAC or RTAPAC in order to ask questions, solicit guidance, or discuss any matters related to potential promotion applications or other issues.

II. Evaluation criteria for tenure and tenure-track promotion applications

II.A. Evaluation of teaching for tenure and promotion applications

Determination that a candidate for tenure or for promotion to Associate Professor or Professor is either Unsatisfactory, Satisfactory, or Excellent, will be made by members of the TTPAC on the basis of their professional judgment. Teaching is a multifaceted activity that includes course design and delivery, curriculum development, and interaction with students. Therefore, the evaluation process should be characterized by multiple sources of information and a broad view of the activities that constitute effective teaching. [Faculty Handbook, Section III.E.2.b(1): Consideration of teaching performance must include, but need not be limited to, the following: self-evaluation, evaluation by peers or AUHs, and student evaluations. Consideration should be given to a faculty member’s commitment to student advising and innovations in teaching as evidenced by development of new course work and teaching methodology.] Additional evidence of teaching performance includes (a) syllabi that are thorough, current, and reflective of the latest developments in the field of study, (b) outlines, exams, and other course materials, (c) student evaluations, both written and numerical averages, (c) grade point averages in courses taught, (d) performance of students on departmental or university assessment instruments, if available, (e) data from exit interviews or alumni reports on teaching performance, (f) support for students writing honors theses and independent studies projects.

Satisfactory Teaching is defined as effectively performing the following activities:

- Providing instruction at a rigorous and challenging level
- Stimulating learning and interest in the subject matter
- Being well-prepared for class
- Informing students of course objectives, assignments, and examination procedures
- Conducting class in a well-organized manner
- Communicating the subject matter clearly
- Maintaining scheduled office hours
- Treating students with courtesy and respect
- Providing career advising to students
- Maintaining fair and impartial grading standards
- Providing timely feedback on progress
- Staying current with the subject matter
- Participating in program activities to assess and update the curriculum

These activities are essential to good teaching and are, therefore, necessary for an evaluation of Satisfactory in the area of teaching

Excellent Teaching: In general, there are multiple paths to teaching excellence. Indicators of excellent teaching include, but are not limited to:

- Fulfilling the requirements for satisfactory teaching performance in an exemplary manner
- Evidence of a strong and sustained commitment to teaching
- Refereed journal publications on teaching methods, pedagogical innovations, course content
- Development of new course or major revisions of existing courses
- Teaching awards
- Outstanding student or peer evaluations
- Supervision of independent studies and honors theses
II.B. Evaluation of scholarly achievement and professional qualifications for tenure and promotion applications

II.B.1. Journal rankings, categories, and points

An applicant’s quality peer-reviewed publications are assigned points based on the journals in which they are published. The PAC ranks quality peer-reviewed journals into five categories:

- A-1 journals worth 11 points
- A-2 journals worth 7 points
- A-3 journals worth 4 points
- B journals worth 2 points
- C journals worth 1 point

For publications accepted after 5/1/2019, the quality peer-reviewed journals in categories A-1, A-2, and A-3 are based on 8 metrics of research impact. Five of these scores come from RePEc: simple impact factor, recursive impact factor, discounted impact factor, recursive discounted impact factor, and hindex. The remaining three scores come from Scopus: CiteScore, SJR, and SNIP. The lists of journals in categories A-1, A-2, and A-3 can be found in Appendix 1. The algorithm for aggregating these metrics into journal rankings can be found in Appendix 2. The B journal category includes any journal which is EconLit-indexed but is not ranked as A-1, A-2 or A-3. The C journal category includes any quality peerreviewed journal which is not EconLit-indexed.

During the spring semester of any academic year, the TTPAC may designate a specific number of research points for a specific publication upon request of the author of that publication. If a faculty member has a journal publication that they believe merits more research points than the number that the TTPAC journal ranking list assigns to the journal where that article was published, then the faculty member may submit a written request to the TTPAC. This request is not to be taken lightly and the faculty member must provide documentation to support the request for classification.

If the publication is in a journal not included in the department’s 8-score superlist, then the author may submit the 8 scores (from RePEc and Scopus) if those scores are available for that journal. In such a case, the faculty member can request to have their publication ranked in the same way as the journals on the department’s 8-score superlist. If the publication is in a journal whose Borda score is in the range of Borda scores for the A-1 journals on the superlist, then that publication will receive 11 points. If the publication is in a journal whose Borda score is in the range of Borda scores for the A-2 journals on the superlist, then that publication will receive 7 points. If the publication is in a journal whose Borda score is in the range of Borda scores for the A-3 journals on the superlist, then that publication will receive 4 points. In cases like these, when the 8 scores are available, then points can be assigned without the TTPAC having to meet and discuss the request.

If the 8 scores (from RePEc and Scopus) are not available for the journal, then a TTPAC meeting, discussion, and vote will be held to evaluate the request. In such a case, the request may contain documentation such as citations of the publication or similar information regarding impact obtained from appropriate sources. In the written request, the faculty member should propose a number of points for their publication, and the TTPAC will either accept or decline the faculty member’s proposal based on a majority vote. If the proposal is accepted, then that publication will be awarded the
proposed number of research points whenever the faculty member makes their next application for tenure and/or promotion. The TTPAC will provide a written ruling on the article in question, with a copy to the AUH. Written requests should be submitted to the TTPAC chair and the AUH by March 31, and the TTPAC will provide their written ruling no later than May 1. Note that this is done at the level of the publication and does not impact the standing of the journal in the TTPAC journal ranking list.

II.B.2. Sufficient conditions for ratings

Faculty members must meet the minimum standards for satisfactory scholarly achievement and professional qualifications to be considered for tenure and promotion. When a faculty member is listed as a co-author on a publication, it is expected that the faculty member has made a clear and substantial contribution to a paper. Therefore, in their promotion and tenure application, the faculty member should clearly state the contribution that they have made to a paper that has multiple authors.

1. Sufficient Conditions for Promotion to Associate Professor or Receipt of Tenure

Satisfactory: A stock of research consisting of 8 research points in total, 80% of which must be articles in quality peer-reviewed journals.

Excellent: a stock of research consisting of a minimum of 16 research points, 80% of which must be articles in quality peer-reviewed journals.

2. Sufficient Conditions for Promotion to Professor

Satisfactory: a stock of research consisting of a minimum of 16 research points, 80% of which must be articles appearing in quality peer-reviewed journals.

Excellent: A stock of research consisting of a minimum of 32 research points, 80% of which must be articles appearing in quality peer-reviewed journals.

3. Additional Rules Regarding the Sufficiency Thresholds’ Required Points

i) Articles in A-ranked journals (A-1, A-2, A-3) must account for at least 30% of the required total points.

ii) For promotion to Professor, at least 40% of the required total points must have been earned in the “base period”, which is defined as the time since the date of the latest TTPAC letter recommending promotion to Associate Professor.

iii) A comment or note in a quality peer-reviewed journal will be assigned one-half (1/2) of the points that would be assigned to an article in the same journal. In all periods, publications in journals ranked A or B which are sole authored will have their point values multiplied by a factor of 1.2.

iv) Publications that were accepted after the applicant began employment at JMU must account for at least 50% of the required total points. This means that:

   • In order to reach the sufficiency point threshold for Satisfactory research for a tenure application, at least 4 points must be from publications that list the author (candidate) as a JMU faculty member. That is half of the 8 total points to achieve Satisfactory research for a tenure application.
• In order to reach the sufficiency point threshold for Excellent research for a tenure application, at least 8 points must be from publications that list the author (candidate) as a JMU faculty member. That is half of the 16 total points to achieve Excellent research for a tenure application.

• In order to reach the sufficiency point threshold for Satisfactory research for a full professor promotion application, at least 8 points must be from publications that list the author (candidate) as a JMU faculty member. That is half of the 16 total points to achieve Satisfactory research for a full professor promotion application.

• In order to reach the sufficiency point threshold for Excellent research for a full professor promotion application, at least 16 points must be from publications that list the author (candidate) as a JMU faculty member. That is half of the 32 total points to achieve Excellent research for a full professor promotion application.

Furthermore, to reach the sufficiency point threshold for Excellent research for a full professor promotion application, publications in ranked journals (A-1, A-2, or A-3) that were accepted after the applicant began employment at JMU must account for at least 4.8 points. That is 15% of the 32 total points to achieve Excellent research for a full professor promotion application.

II.B.3. Alternate research vehicles

Monographs, chapters in books, textbooks, published proceedings papers and book reviews are legitimate alternate research vehicles. However, given the differences in goals, audiences, and quality, it is virtually impossible for the department to design a weighting scheme or specify the appropriate rates of substitution between these alternate research vehicles. Historically, scholarship appearing in these outlets have been awarded one point, and sometimes only a fraction of a point, thus it is the responsibility of the candidate to specify the points that he or she believes to be appropriate for an alternate research vehicle and to provide a written justification for that point specification.

II.C. Evaluation of service for tenure and tenure-track promotion applications

Determination that a candidate for tenure or for promotion to Associate Professor or Professor is either Unsatisfactory, Satisfactory, or Excellent, will be made by the members of the TTPAC on the basis of their professional judgment. Entering into that judgment should be evidence regarding the quantity and quality of their service activities for the Department of Economics, the College of Business, James Madison University as a whole, the economics profession as a whole, the academic community as a whole, and the non-academic community at large, both locally and more widely.

The Department of Economics recognizes three levels of service, in order of increasing merit:

a) **Level 3 Service** is defined as participation in department, college, and university events for which faculty visibility is important. Generally, such participation does not require additional efforts either before or after. All faculty members are expected to participate in a variety of level 3 activities. Examples of level 3 service include:

- Attending COB Parent’s Day Open House, COB Homecoming Open House, COB awards ceremonies, etc.
- Participating in faculty recruiting (meeting with candidates and attending candidate seminars)
- Meeting with potential employers of COB students
- Meeting with prospective students or their parents
b)  **Level 2 Service** is defined as important activities in support of one’s program, the college, the university, or the profession that involve a moderate to significant time commitment. It is anticipated that the bulk of a faculty member’s service activities will fall into this category. Examples of Level 2 service include:

- Member of department, college, or university committees or of Faculty Senate
- Proceedings editor or program chair for a professional conference
- Active participation in curriculum development or program assessment
- Participation in university-sponsored programs
- Significant work refereeing for professional journals
- Significant service as a discussant at professional conferences

c)  **Level 1 Service** is defined primarily as activities that involve a very significant time commitment. Secondary indicators of Level 1 service are 1) a high level of personal responsibility, 2) involvement in activities that are critical to the mission of the department, college, university, or professional organization, 3) distinguishing oneself in a leadership role, whether elected or appointed, 4) serving, with distinction, one’s profession or the external community in a role that exploits one’s professional knowledge, skills, and talents, 5) making a difference in those areas in which one has chosen to serve, and 6) being widely recognized as one who has an exemplary attitude towards service commitments and who serves as a role model for other faculty. Level 1 service should not be interpreted as requiring the presence of every indicator of excellent performance. However, in all cases there should be evidence of a substantial contribution and an active role. Examples of level 1 service include:

- Major responsibility for a significant curriculum reform
- Speaker of Faculty Senate
- Chair of AACSB or SACS re-accreditation efforts or of a similarly important university committee
- Faculty advisor to an active, successful student organization
- High level office in a prestigious regional, national, or international organization involving a significant time commitment
- Editorial leadership at respected journals (such as editor-in-chief, managing editor, or especially active associate editors / co-editors)
- Program assessment coordinator

III. Evaluation criteria for RTA promotions

Promotion to the rank of senior lecturer is contingent upon substantial professional achievements, evidenced by an appropriate combination of teaching, scholarship/professional practice and service as established by the academic unit. An excellent rating in teaching and at least satisfactory ratings in the other two areas is required for promotion to senior lecturer. In addition to the requirements for senior lecturer, promotion at the rank of principal lecturer is contingent upon recognition of outstanding professional accomplishment, evidenced by an appropriate combination of teaching, scholarship/professional practice and service as established by the academic unit. Excellent ratings in teaching and one other area and at least a satisfactory rating in the third area are required for promotion to principal lecturer.
The Department of Economics values RTA activities that support the goals of the college and university. RTA candidates for promotion must qualify as Scholarly Academic (SA), Scholarly Practitioner (SP), Practice Academic (PA), or Instructional Practitioner (IP) as defined by the Association to Advance Collegiate Schools of Business (AACSB).

Normally, a faculty member should have completed five years in academic rank before being reviewed for promotion. If a faculty member applies for promotion before completing five years in academic rank, they must present compelling evidence of accomplishment to be awarded early promotion. This means that to receive a rating of Excellent in a particular area, the candidate must significantly exceed the normal expectations of Excellent accomplishment in that area. Similarly, this means that to receive a rating of Satisfactory in a particular area, the candidate must significantly exceed the normal expectations of Satisfactory accomplishment in that area.

There is no requirement for a lecturer to apply for promotion to senior lecturer or principal lecturer. Otherwise, the deadlines for RTA promotion applications are identical to those defined for tenure-track applications described above and indicated by the faculty handbook. The AUH and TTPAC chair should be notified of intent to apply for RTA promotion by September 1, and the candidate’s application packet must be made available to the RTAPAC and the AUH by October 1. If a candidate is applying for senior lecturer after five or more years of service at JMU, then they should provide materials from the past five years. If a candidate is applying for senior lecturer early with less than five years of service at JMU, then they should provide materials from the time they started working at JMU. If a candidate is applying for principal lecturer after ten or more years of service at JMU, then they should provide materials from the past ten years. If a candidate is applying for principal lecturer with less than ten years of service at JMU, then they should provide materials from the time they started working at JMU.

III.A. Evaluation of teaching for RTA promotion

RTA faculty teaching will be evaluated similarly to tenure-track faculty teaching. Determination that a RTA candidate for promotion to senior lecturer or principal lecturer is either Unsatisfactory, Satisfactory, or Excellent will be made by members of the RTAPAC on the basis of their professional judgment. Teaching is a multifaceted activity that includes course design and delivery, curriculum development, and interaction with students. Therefore, the evaluation process should be characterized by multiple sources of information and a broad view of the activities that constitute effective teaching.

Consideration of teaching performance may include but is not limited to a well-developed teaching philosophy, self-evaluation, evaluations by peers and/or AUHs, and student evaluations of the course content, assignments, learning experiences, and intellectual challenges (i.e., not on the individual style or personality of the instructor). Student evaluations may only be utilized as a formative tool or as part of a teaching portfolio. Consideration may be given to a faculty member’s commitment to student advising, student mentoring, innovations in teaching, contributions to departmental curriculum improvement, efforts to improve teaching as evidenced by development of new course work and teaching methodology, and other contributions to student success. Consideration of teaching performance may include artifacts to demonstrate student progress and learning, such as edited papers, student projects, student accomplishments, testimony from students, and course portfolios (e.g., presentation material, assignments, and rubrics). Any such policy shall apply equally to all similarly situated faculty members in the academic unit. Furthermore, student evaluation scores may not be the primary method by which teaching performance is evaluated.

*Satisfactory Teaching* is defined as effectively performing the following activities:
• Providing instruction at a rigorous and challenging level
• Stimulating learning and interest in the subject matter
• Being well-prepared for class
• Informing students of course objectives, assignments, and examination procedures
• Conducting class in a well-organized manner
• Communicating the subject matter clearly
• Maintaining scheduled office hours
• Treating students with courtesy and respect
• Providing career advising to students
• Maintaining fair and impartial grading standards
• Providing timely feedback on progress
• Staying current with the subject matter
• Participating in program activities to assess and update the curriculum

These activities are essential to good teaching and are, therefore, necessary for an evaluation of Satisfactory in the area of teaching

**Excellent Teaching**: In general, there are multiple paths to teaching excellence. Indicators of excellent teaching include, but are not limited to:

• Fulfilling the requirements for satisfactory teaching performance in an exemplary manner
• Evidence of a strong and sustained commitment to teaching
• Publications in refereed journals relating to teaching methods, pedagogical innovations, and course content
• Development of new course or major revisions of existing courses
• Teaching awards
• Outstanding student or peer evaluations
• Supervision of independent studies and honors theses

### III.B. Evaluation of scholarly achievement and professional qualifications for RTA promotion

1. **Promotion to Senior Lecturer**

   Satisfactory: Scholarship/Professional Practice must satisfy the Scholarly Academic (SA), Scholarly Practitioner (SP), Practice Academic (PA), or Instructional Practitioner (IP) criteria as defined by the Association to Advance Collegiate Schools of Business (AACSB).

   Excellent: Scholarship/Professional Practice must exceed the Scholarly Academic (SA), Scholarly Practitioner (SP), Practice Academic (PA), or Instructional Practitioner (IP) criteria as defined by the AACSB.

2. **Promotion to Principal Lecturer**

   Satisfactory: Scholarship/Professional Practice must satisfy the Scholarly Academic (SA), Scholarly Practitioner (SP), Practice Academic (PA), or Instructional Practitioner (IP) criteria as defined by the AACSB.
Excellent: Scholarship/Professional Practice must significantly exceed the Scholarly Academic (SA), Scholarly Practitioner (SP), or Instructional Practitioner (IP) criteria as defined by the AACSB.

III.C. Evaluation of service for RTA promotion

Determination that a RTA candidate for promotion to Senior Lecturer or Principal Lecturer is either Unsatisfactory, Satisfactory, or Excellent will be made by the members of the RTAPAC on the basis of their professional judgment. Entering into that judgment should be evidence regarding the quantity and quality of their service activities for the Department of Economics, the College of Business, James Madison University as a whole, the economics profession as a whole, the academic community as a whole, and the non-academic community at large, both locally and more widely.

The Department of Economics recognizes three levels of service, in order of increasing merit:

a) **Level 3 Service** is defined as participation in department, college, and university events for which faculty visibility is important. Generally, such participation does not require additional efforts either before or after. All faculty members are expected to participate in a variety of level 3 activities.

b) **Level 2 Service** is defined as important activities in support of one’s program, the college, the university, or the profession that involve a moderate to significant time commitment. It is anticipated that the bulk of a faculty member’s service activities will fall into this category.

c) **Level 1 Service** is defined primarily as activities that involve a very significant time commitment. Secondary indicators of Level 1 service are 1) a high level of personal responsibility, 2) involvement in activities that are critical to the mission of the department, college, university, or professional organization, 3) distinguishing oneself in a leadership role, whether elected or appointed, 4) serving, with distinction, one’s profession or the external community in a role that exploits one’s professional knowledge, skills, and talents, 5) making a difference in those areas in which one has chosen to serve, and 6) being widely recognized as one who has an exemplary attitude towards service commitments and who serves as a role model for other faculty. Level 1 service should not be interpreted as requiring the presence of every indicator of excellent performance. However, in all cases there should be evidence of a substantial contribution and an active role.

IV. Third-year reviews of tenure-track faculty

As stated in the Faculty Handbook, the TTPAC and AUH will independently review the accomplishments of tenure track faculty at the midpoint of the probationary period, typically during the third year of candidacy. The TTPAC and AUH will rate work of the candidate in teaching, scholarly achievement and professional qualifications and service (if part of the candidate’s duties). The written evaluation should identify any aspects of the candidate’s work in which improvement is needed to be on course to receive tenure and/or promotion. In order to determine whether the candidate is making satisfactory progress towards a Satisfactory rating in the areas of teaching and service, the TTPAC will evaluate the evidence related to the criteria defined in Section II above. In order to determine whether the candidate is making satisfactory progress towards a Satisfactory rating in scholarly achievement and professional qualifications, the TTPAC will examine the publications, working papers and status of papers under review.

V. Early promotion and early tenure
Faculty may be considered for early tenure and/or early promotion to Associate Professor or Professor if their performance significantly exceeds normal expectations in all three functional areas of a faculty member’s responsibilities. This does not mean that the candidate has to necessarily satisfy the regular requirements for being Excellent in all three areas. Rather, for a tenure application, it means that the candidate has to exceed normal expectations of Excellent in at least one area, and the candidate has to exceed normal expectations of Satisfactory in two other areas.

VI. Annual evaluation guidelines

VI.A. Annual evaluation overview including relationship to tenure and promotion

The University recognizes three areas of professional contribution: teaching, scholarly achievement and professional qualifications, and professional service. All full-time instructional faculty members at James Madison University are subject to an annual evaluation by the AUH of their performance in each of these three areas. The purpose of this annual evaluation is to promote professionalism, to encourage performance at the highest levels and to indicate areas in which improvement is needed. Evaluations are also used in making personnel decisions, including allocation of merit pay increases, continuation of employment, and initiation of post-tenure review. Annual evaluations by the AUH will be conducted after the conclusion of each academic year. The procedures and criteria for annual evaluations should be applied equally to all similarly situated faculty members in the academic unit. The Department of Economics values activities that support the goals of the college and university.

The annual evaluation process is separate from the promotion and tenure evaluation process. A succession of satisfactory or excellent annual evaluations in teaching, scholarship or service is not, in and of itself, conclusive evidence that the faculty member’s work is satisfactory or excellent for purposes of tenure or promotion.

VI.B. Annual evaluation procedures including appeals

The annual evaluation must consider the performance of the faculty member both within and outside of the academic unit in the areas of teaching, scholarly achievement & professional qualifications, and professional service. Additionally, any aspects of a faculty member’s conduct that impacts performance, positive or negative, should be addressed in these evaluations. The AUH will solicit input from appropriate individuals outside of the academic unit when the faculty member has assignments outside of the academic unit. The AUH may solicit information from the TTPAC and RTAPAC.

If an instructional faculty member’s primary assignment is outside of the academic unit (e.g., in a center, institute, or administrative department), the person who performs the annual evaluation must be the supervisor of the primary assignment, with input from any AUH where the faculty member teaches or has other responsibilities.

In each of the three performance areas, a faculty member must be evaluated as excellent, satisfactory, or unsatisfactory. In addition to an evaluation in each of the three areas of performance, the faculty member’s overall performance must be evaluated as acceptable or unacceptable. A factor in determining overall annual performance must be the relative weight associated with each of the areas of performance.

The following scale is used by the Economics Department for numerical ratings in each of the three performance categories.
Excellent 7-9  
Satisfactory 4-6  
Unsatisfactory 1-3  

Faculty Anticipated Activity Plan  
By June 1 (which is the same deadline for submitting faculty member annual reports to the AUH), each faculty member must submit a description of anticipated activities for the coming year to the AUH. The relative weights of the three performance areas of teaching, scholarly achievement & professional qualifications, and professional service for an individual faculty member must be determined by the faculty member and the AUH prior to the start of the academic year. The relative weights remain unchanged unless the faculty member and AUH have agreed to change them. If the faculty member and AUH have agreed to change the relative weights, then the agreement should be shared with the TTPAC or RTAPAC. The agreement on weights may be renegotiated during the year under appropriate circumstances. Summary of Activities  
By June 1, each faculty member must submit a summary of activities and accomplishments during the previous 12 months in the areas of teaching, scholarly achievement & professional qualifications, and professional service to the AUH for review and evaluation purposes. For the responsibilities of faculty members returning from educational leave, see Faculty Handbook, Section III.J.1.a.  

Preliminary Evaluation  
A preliminary written evaluation is to be given to each faculty member by the AUH prior to the regular annual evaluation conference. The preliminary evaluation must be given to the faculty member at least one day prior to the scheduled conference.  

Conference  
The evaluation conference must provide an opportunity to discuss the faculty member’s performance, professional contributions, and needs as perceived by both the faculty member and the AUH. The conference may be cancelled by mutual agreement of the faculty member and the AUH, if both agree on the terms of the preliminary evaluation. The official written evaluation must not be finalized until after the evaluation conference, unless the faculty member and AUH determine that no conference is required. The AUH must provide the official written evaluation to the faculty member by Oct. 1. Any failure to meet this deadline will extend the appeal process by the number of days the written evaluation is late.  

Appeal  
Before the AUH submits the official written evaluation to the dean, there must be an opportunity for the faculty member to review and appeal the evaluation to the College PAC. The faculty member has a maximum of seven days following the receipt of the official written evaluation to make the appeal in writing. Failure to file a timely written appeal will result in the evaluation being sent forward to the dean, and no further appeal rights are available. In considering an appeal, the crucial questions for the reviewing body are whether all relevant information was objectively reviewed by the AUH in accordance
with evaluation criteria established by the academic unit and whether the AUH evaluated similar achievements among similarly situated academic unit members using the same standard of judgment.

The recommendations of the reviewing body will be given to the AUH, with a copy to the faculty member and the dean. The reviewing body may recommend that the AUH’s evaluation be upheld or modified. If the AUH agrees with the recommendations of the reviewing body, they will take the appropriate action and either confirm or modify their original evaluation. The AUH will notify the reviewing body, the faculty member, and the dean of their decision. The appeal process in the academic unit must be completed by Oct. 21.

**Final Evaluation**

The faculty member and the AUH must sign the final evaluation, and the AUH will send a copy of it to the dean by Oct. 28. If the faculty member does not sign the final evaluation, the AUH will forward it to the dean with a notation that the faculty member declined or failed to sign. If the AUH’s evaluation is not modified as recommended by the reviewing body, the dean will review the AUH’s evaluation and the reviewing body’s recommendations to determine whether the AUH’s evaluation will be upheld or modified. The dean is not bound by the reviewing body’s recommendations and may take any action on the evaluation they deem appropriate. The decision of the dean on the evaluation is final and is not subject to appeal.

**Unsatisfactory Evaluation of Tenured Faculty**

In those cases in which a tenured faculty member’s overall annual performance is evaluated as unacceptable, the faculty member may appeal the evaluation to the dean within five days, by providing a written document outlining the reasons for the overall evaluation to be modified. The dean may either uphold the overall evaluation or modify it. The decision of the dean is final, and may not be appealed. If the faculty member does not appeal the overall unacceptable evaluation, or if the dean upholds the overall unacceptable evaluation, the AUH must inform the TTPAC and, in consultation with the faculty member, must immediately design a professional development plan. The university will provide funding for a focused program of activities designed to improve performance agreed upon by the AUH and the faculty member. However, if the faculty member does not agree to the program chosen by the AUH, they will receive no financial support from the university to improve their performance, but the faculty member will still have the responsibility to bring their performance up to acceptable levels in the next annual performance appraisal. While scheduling flexibility is appropriate, the development plan will be initiated at the earliest opportunity to effect positive change in the next annual performance appraisal. For details on post-tenure review, see Faculty Handbook, Section III.E.8.

**Retention of Annual Evaluations**

The department will retain copies of all faculty annual evaluations from the previous five years. The TTPAC and RTAPAC have the right to examine a faculty member’s annual evaluations from the past five years anytime a faculty member applies for tenure and/or promotion. In those cases in which a faculty member’s overall annual performance is evaluated as unacceptable, the academic unit will retain, for at least two years, copies of the materials considered in conducting the annual evaluation.

**VI.C. Annual Evaluation Criteria**

Teaching (Tenure-track, tenured, and RTA faculty)
The following elements will be taken into consideration by the AUH when evaluating a tenure-track, tenured, or RTA faculty member’s performance in the teaching area.

- Number of course preps, level and type of class taught, class size, and other descriptors that may affect teaching success.

- Grade distributions or per section GPA.

- Teaching honors and awards.

- Participation in workshops, seminars, or other professional development focused on teaching.

- Innovation in teaching methods and materials.

- Student evaluations (numerical and written comments).

- Student complaints.

- Contributions to individualized instruction (e.g., special studies, Honor’s thesis).

- Unique challenges, special circumstances, and supplemental teaching-related activities faced or undertaken by the faculty member.

- Other elements deemed appropriate at the discretion of the AUH.

Scholarly Achievement & Professional Qualifications (Tenure-track and tenured faculty)

The following elements will be taken into consideration when evaluating a tenure-track or tenured faculty member’s performance in the area of scholarship.

- Contribution made towards quality publications.

- Sustained and ongoing scholarly effort.

- Where applicable, progress towards tenure and promotion.

- Satisfactory standing according to CoB AACSB Faculty Qualification Guidelines.

- Other elements deemed appropriate at the discretion of the AUH.

Scholarly Achievement & Professional Qualifications (RTA faculty)

The following elements will be taken into consideration when evaluating an RTA faculty member’s performance in the area of scholarly achievement & professional qualifications.

- Satisfactory standing according to CoB AACSB Faculty Qualification Guidelines.

- Sustained and ongoing scholarly effort.

- Other elements deemed appropriate at the discretion of the AUH.
Service Activities (Tenure-track, tenured and RTA faculty)

The following elements will be taken into consideration by the AUH when evaluating a tenure-track, tenured, or RTA faculty member’s performance in the service area.

- Service activities on behalf of the department, college, or university, and on behalf of professional organizations
- Professionally related service to the community (e.g., guest speaker for the Small Business Development Center as opposed to coaching a local youth soccer team)
- Breadth and depth of the service commitment
- Amount of time required for the service activity
- Level of responsibility involved (e.g., chair of a committee versus a member)
- Visibility of the activity (e.g., service that enhances the visibility or reputation of the department or college such as editor of a scholarly journal)

VII. College of Business Policies Related to AACSB Definitions Regarding Faculty Qualifications

The COB policies concerning faculty qualifications (Scholarly Academic, Practice Academic, Scholarly Practitioner, and Instructional Practitioner status) are available from the Associate Dean of Academic Affairs of the College of Business or at https://www.jmu.edu/cob/faculty-staff-resources.shtml.

APPENDIX 1:
Journal categories for publications

A-1 Journals for publications accepted between 7/1/1995 and 7/1/2006
American Economic Review
Economic Journal
Econometrica
International Economic Review
Journal of Economic Literature
Journal of Economic Theory
Journal of Finance
Journal of Financial Economics
Journal of Monetary Economics
Journal of Political Economy
Quarterly Journal of Economics
Rand Journal of Economics
Review of Economics and Statistics
Review of Economic Studies

A-2 Journals for publications accepted between 7/1/1995 and 7/1/2006
Brookings Papers on Economic Activity
Canadian Journal of Economics
Economic Inquiry

APPENDIX 2: Ranking algorithm for articles accepted after 5/1/2019

The ranking algorithm is implemented in R and is based on the following 8 metrics of research impact:

a. **From RePEc:** Simple impact factor, recursive impact factor, discounted impact factor, recursive discounted impact factor, and h-index.

b. **From Scopus:** CiteScore, SJR, and SNIP

**Step 1.** We begin by downloading the top 500 journals according to the recursive discounted factor provided by RePEc. This is our master list.

**Step 2.** We download the rankings from RePEc for simple discount factor, recursive impact factor, discounted impact factor, and h-index, including the top 1000 journals for each respective list. These 4 are then matched with our master list from step 1 above giving us all 5 metrics from RePEc in the master list.

**Step 3:** Next for each journal in our master list we get its unique ISSN number. This allows us to match these journals with the Scopus database that already provides ISSN for their journals.

**Step 4.** The RePEc master list from the previous step is then merged with the entire Scopus database using ISSN numbers. We now have raw scores for each of the eight metrics listed above.
**Step 5.** We delete journals from the master list using the deleted journal list previously shared with the PAC.

**Step 6.** We adjust the citation counts for each of the 22 survey and/or commission-invitation only journal and recompute their impact factors following Combes and Linnemer (2010)\(^1\). Note that this adjustment will only affect 5 impact metrics in our data: simple, recursive, discounted, recursive discounted, and CiteScore. This is because for only these metrics we have raw data on citations and number of documents.

**Step 7.** We compute the ranking for each of the 8 metrics listed above, giving us 8 different rankings for each journal in our sample. We do not break ties in any ranking but instead assign the minimum rank to all ties. For example, if there is a tie between rank 2 and 3, both journals get awarded a rank of 2.

**Step 8.** To aggregate our 8 individual rankings into a final ranking we use a consensus-based framework that is based on the Borda score. The formula of the Borda score for a journal \(i\) can be expressed by the following equation:
Borda Score \((i) = N_1 \times (N_2 + 1) - \sum_{s=1}^{g} r_{s}^{i}\)

Here \(i\) indexes a journal, and \(s\) indexes a particular ranking in our sample. \(r_{s}^{i}\) is the rank of journal \(i\) in a ranking \(s\). \(N_1\) is the number of rankings we use and \(N_2\) is the number of journals in our sample.

**Step 9.** We finally rank journals in the descending order of the Borda Score to obtain the final ranking.

**Step 10.** Category A-1 consists of the journals ranked 1-20. Category A-2 consists of the journals ranked 21-90. Category A-3 consists of the journals ranked 91-200.

**Approvals**
