| | 14-16 | | 14-16 |

* Students in the VWCC Biotechnology program will have completed five of the fifteen credits of Biotechnology Elective Courses required for the JMU Biotechnology degree, provided they complete coursework with a grade of "C" or higher.

Total credit hours transferred from VWCC: 63

Minimum credit hours required at JMU: 60

Program total: 123 credit hours

JMU Admission Criteria: This agreement does **not** guarantee admission to JMU. However, students earning the A.S. in Science: Biotechnology from VWCC are eligible for admission to JMU under the JMU-VCCS Guaranteed Admission Agreement (GAA). Students intending to apply to JMU through the GAA must submit a Letter of Intent and must meet all requirements, including a 3.0 GPA and a minimum of 24 credit hours completed after high school. Requirements and forms are available on the JMU Guaranteed Admissions Agreement webpage. Students who do not qualify for guaranteed admission should apply through the transfer admission process. Competitive applicants will have mostly As & Bs and have completed at least one class in each of our four core areas (English, mathematics, lab science, and social science). Students who meet those criteria are viewed as strong candidates for admission. Apply online to JMU by March 1 for Fall or October 15 for Spring.

JMU General Education Requirements: In accordance with the State Policy on Transfer, students who transfer to James Madison University from a Virginia Community College will have satisfied James Madison University's General Education requirements if they have earned an Associate of Arts or Associate of Science degree. Students earning the Associate of Science: Biotechnology at VWCC will receive a waiver of General Education requirements at JMU after submitting a transcript showing their associate degree has been conferred. Students who transfer with a small number of associate degree requirements not yet completed may request a consultation with a JMU Next Transfer Advisor to determine whether they can complete the associate degree by transferring coursework completed at JMU back to their community college. Students should be aware that some courses required for the associate degree may not be offered at JMU.

JMU Graduation Requirements: JMU requires that students earn a minimum of 120 credit hours to earn the Bachelor of Science degree in Biotechnology. Of these, at least 60 must be completed at a 4-year university, and at least 30 must be completed at JMU. For any course to transfer, it must be completed with a grade of "C" or higher. Students pursuing a Bachelor of Science degree must maintain at least a 2.0 GPA overall and in their major coursework at JMU. Additional information about graduation requirements is available in the JMU Undergraduate Catalog.

Terms of Agreement: The Agreement, which will be implemented beginning in Fall 2025, will be annually reviewed, and revised as appropriate, beginning in Fall 2026. Course requirements, names and numbering are subject to annual review to ensure compliance with any changes at either institution.

The undersigned have reviewed and agreed that James Madison University (JMU) and Virginia Western Community College (VWCC) should enter into this Articulation Agreement.

Agreed by the parties on the 19th day of May 2025.

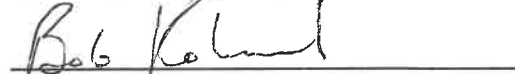

Virginia Western Community College

Dr. Elizabeth Wilmer

Vice President of Academic and Workforce Solutions

James Madison University

Dr. Bob Kolvoord

Interim Provost and Senior Vice President
Academic Affairs
