

“CFI in many ways helped me find my confidence as a professional and also me how to be a humble professional. CFI gives you the opportunity to be innovative in a safe space and is a place that encourages curiosity. Everything is a learning lesson including our ability to learn about our community and how we continue to contribute to it. CFI is filling a gap or a void for how we relate to one another and how we all come together in our mission to produce engaged and enlightened citizens.”
