

**Dr. Jonathan Fay**  
*University of Maryland  
School of Medicine*

## **Molecular details of perception**

**About Dr. Fay.** The Fay lab uses cryo-EM as a tool for structural biology and centers around three topics of research. These include (1) structural studies of G protein-coupled receptors, (2) methods to improve and expedite cryo-EM structural studies, and (3) protein structure and function of ABC proteins.

**Meet the Speaker**  
**Seminar**

**2:30 pm, PCB 3144**  
**3:30 pm, King 159**
