

SEMINAR
Friday, February 24

Taylor Albertelli

JMU CBC Class of 2019
Cleveland Clinic
Cleveland, OH

**Erlenmeyer flasks to scalpels: My journey
from chemistry to "gross" surgical
pathology and everything in between**

Taylor Albertelli is a 2019 alum of JMU Chemistry and Biochemistry and a graduate of the Rosalind Franklin University School of Science and Medicine. She has a masters degree in Pathologists' Assistant studies and currently works as a board-certified PathA at the Cleveland Clinic. In this seminar, she will describe the steps she took to become a mid-level medical practitioner and how she applies the skills that she learned during her time at JMU to her career on a daily basis. She will share information about other amazing careers in the medical field that utilize STEM degrees. Come take a peek inside the incredible world of Pathology & Laboratory Medicine, and see how the word "gross" actually has more than one meaning!

Meet the Speaker 2:15pm, PCB 3144
Seminar 3:30pm, King 159
