

1993–2022 GLOBAL OVERVIEW OF THE U.S. Conventional Weapons Destruction Program

MAP LEGEND

- U.S. supported activity in FY22
- Received U.S. support in the past
- Mine-impact free & U.S. supported activity in FY22
- Mine-impact free with past U.S. support

The United States remains the world's single largest financial supporter of global conventional weapons destruction efforts, which promote international peace and security by reducing humanitarian hazards from landmines and explosive remnants of war in post-conflict communities. The United States also partners with nations worldwide to reduce the availability of and illicit access to excess, poorly-secured, or otherwise at-risk small arms and light weapons, including man-portable air-defense systems (MANPADS), and ammunition.

The United States is committed to reducing these threats worldwide and is the leading financial supporter of conventional weapons destruction, providing more than \$4.6 billion in assistance to more than 120 countries and areas since 1993. The Department of State, Department of Defense, and the U.S. Agency for International Development (USAID) work together with foreign governments, private companies, international organizations, and nongovernmental organizations to reduce excess small arms and light weapons and conventional munitions stockpiles (including MANPADS), implement best practices for physical security and stockpile management at conventional weapons storage sites, and carry out humanitarian mine action programs. In fiscal year 2022, the United States invested over \$376 million* in conventional weapons destruction programs globally.

**initial planned allocation*

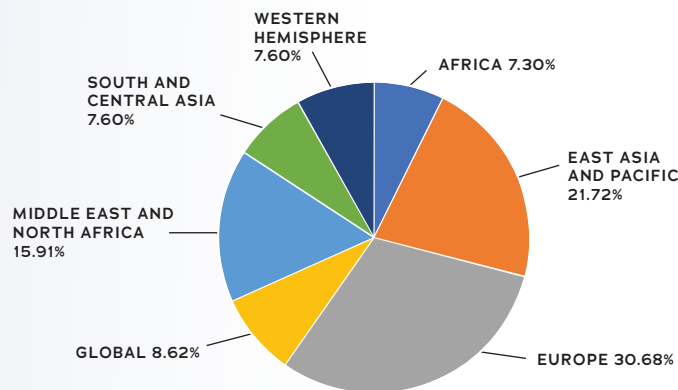

175 MILLION
SQ M LAND RETURNED
TO COMMUNITIES

200,112
EXPLOSIVE REMNANTS
