SHENANDOAH HALL

ACCESSIBLE DESCRIPTION OF FLOOR PLAN

COMPLETED: 2009

CAPACITY: 423 residents

This is a five-story U-shaped structure with a ground floor, and its two wings connect only on the ground and first floors. The ground floor has three entrances: one on the B-wing side facing the service road and two at the front by a Jaccard-secured vestibule leading into the lobby. The lobby has the hall office in front and hallways to A and B wings. A wing contains a lounge with a kitchen, a laundry room, a short hall with a stairwell and elevator, and mechanical spaces. B wing has a game room with a kitchen, a stairwell, a laundry room, an elevator, and mechanical spaces.

The first floor has two courtyard entrances. From the lobby area, there are seating areas, public bathrooms, and hallways leading to A and B wings. A small hallway also leads to the hall director's office, a stairwell, and a lounge with restricted courtyard access. Both A and B wings on this floor have similar layouts: a small lounge, a hallway with a stairwell, vending, an elevator, bedrooms, one community bathroom, another lounge, and mechanical spaces at the end, along with courtyard entrances.

On the second floor, both wings again mirror each other. Each has a lounge near the elevator, a stairwell, a hallway of bedrooms, two community bathrooms (one men's, one women's), a study lounge, and a stairwell at the end with an entrance facing E-hall. Floors three through five follow the same layout, with the only difference being the alternating location of the study lounge: right on the third floor, left on the fourth, and right on the fifth for both wings.
