

# CORONAVIRUS (COVID-19)

## Cleaning Guide

Brought to you by JMU's Off-Campus Life

### COVID-19 CLEANING GUIDELINES

- Clean before using disinfectants; disinfectants don't work on dirty surfaces
- Follow product label instructions for safe and effective use
- Use products in well ventilated areas
- Clean, replace and disinfect cleaning tools after use
- Wash hands regularly with soap and water for 20 seconds
- Wear a face covering and appropriate protective equipment for cleaning
- Encourage those around you to help Stop the Spread by regularly cleaning and disinfecting their homes

### CLEAN & DISINFECT MULTIPLE TIMES A DAY

High touch areas such as dining tables, laptops, desks, chairs, light switches, door handles, faucets, elevator buttons, handrails and more are prone to harboring harmful bugs like COVID-19. Make sure to regularly clean common areas and keep a to-go cleaning kit in your bag when you're out in public!

### MAINTAIN ROUTINE CLEANING

- Vacuum high traffic areas
- Use furniture friendly disinfectant sprays
- Wipe down any and all handles regularly
- Maintain a clean kitchen and eating area in your home
- Regularly clean your car, especially things like the steering wheel, gearshift, and radio button controls
