

SUBSEQUENT ENROLLMENT: ADMITTED TO JMU, NOT ENROLLED

ANALYTICS & DECISION SUPPORT

OFFICE OF PLANNING, ANALYTICS & INSTITUTIONAL RESEARCH

**JAMES MADISON
UNIVERSITY®**

Background

This report summarizes the subsequent enrollment trends for JMU applicants who were admitted but did not enroll. The relevant list of applicants was submitted to the National Student Clearinghouse (NSC) as a subsequent enrollment query. We then analyzed the data received back from the NSC to determine what institutions (if any) these applicants attended *during the term in which they had originally applied for JMU*.

Applicants were included in this report if they:

1. Applied to JMU as first-time, first-year undergraduates for Fall 2023.
2. Had no enrollment record for the relevant admit term (regardless of enrollment deposit)

Population: A total of 23,574 unique students were included in the National Student Clearinghouse data submission.

Report Outline

Overall Outcomes

Subsequent Enrollment Institution Summary

Residency

In-State (Virginia)

Subsequent Enrollment Institution Summary

Out-of-State (Non-Virginia)

Subsequent Enrollment Institution Summary

Overall Outcomes

Of the 23,574 applicants who did not enroll at JMU, 73.4% enrolled at another institution within during the term in which they applied to JMU.

Outcome	N	%
No Subsequent Enrollment Record Found	6,263	26.6%
Subsequent Enrollment Record Found	17,311	73.4%
Grand Total	23,574	100.0%

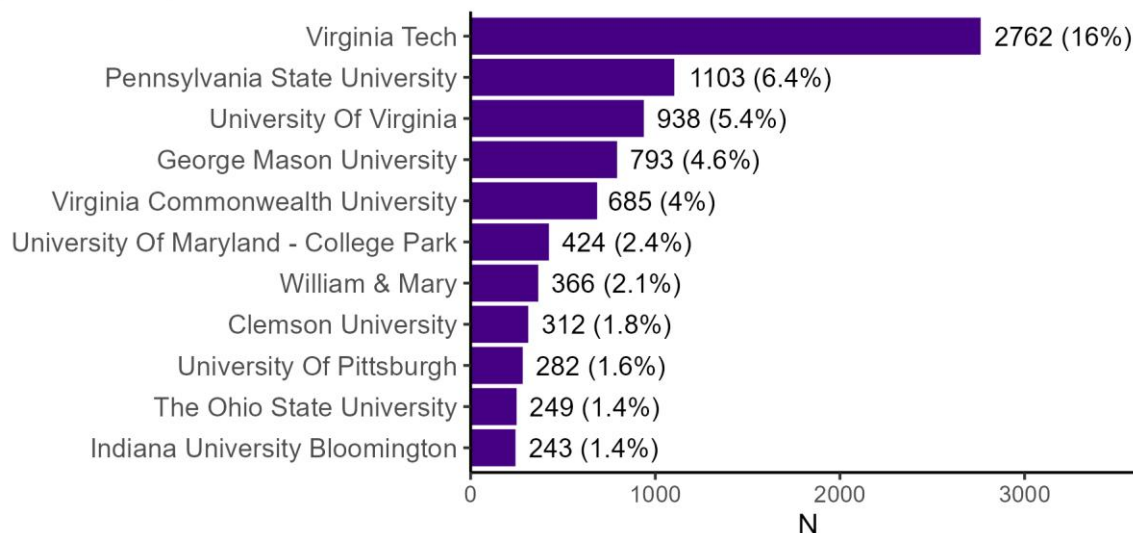

Subsequent Enrollment Institution Summary

The following table outlines key information about the types of institutions attended by the applicants who went on to subsequently enroll at other institutions. Note that the numbers below may not total to 17,311 as some records were missing institutional characteristics.

Institutional Characteristics	N	%
Control		
Public	13,360	22.8%
Private	3,951	77.2%
Type		
2-year	523	3.0%
4-year	16,788	97.0%
Location		
In-State	6,898	39.8%
Out of State	10,413	60.2%

There were 698 unique institutions in which students enrolled. The top ten institutions for subsequent enrollment are presented below.

Top 10 Subsequent Enrollments Among Students Admitted not Enrolled (n = 17311)

Residency

Residency status is based on tuition residency on the application.

In-State (Virginia)

There were 10,814 students from Virginia who were admitted and did not enroll, of which 8,427 had subsequent enrollment information for the term in which they applied to JMU.

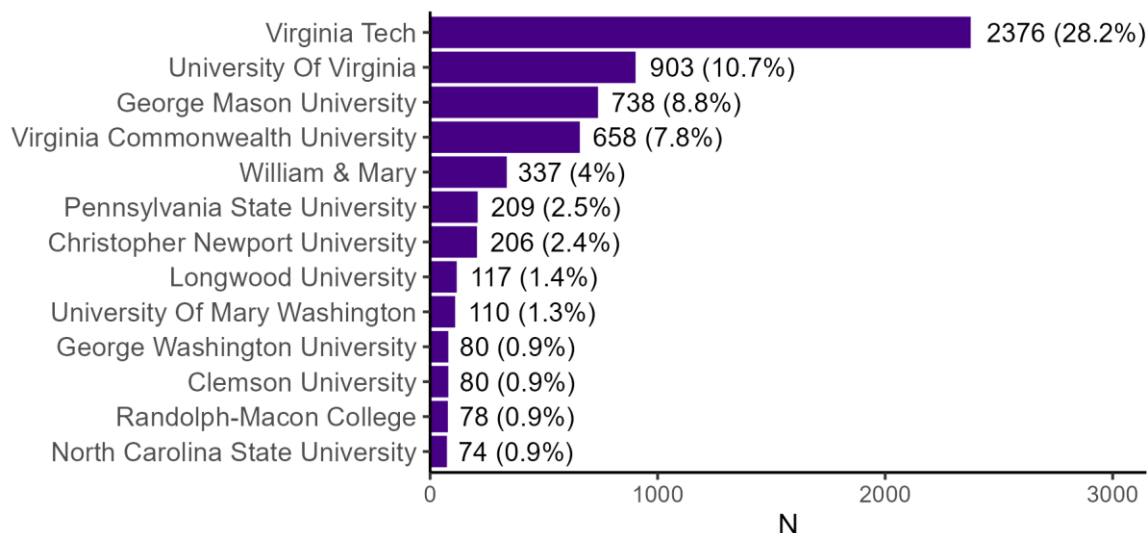

Outcome	N	%
No Subsequent Enrollment Record Found	2,387	22.1%
Subsequent Enrollment Record Found	8,427	77.9%
Grand Total	10,814	100.0%

The following table outlines key information about the types of institutions attended by the applicants who went on to subsequently enroll at other institutions. Note that the numbers below may not total to 10,814 as some records were missing institutional characteristics.

Institutional Characteristics	N	%
Control		
Public	7,244	14.0%
Private	1,183	86.0%
Type		
2-year	262	3.1%

4-year	8,165	96.9%
Location		
In-State	6,239	74.0%
Out of State	2,188	26.0%

Top 10 Subsequent Enrollments Among In-State Students Admitted not Enrolled (n = 10814)

Out-of-State (Non-Virginia)

There were 12,760 students from Virginia who were admitted and did not enroll, of which 8,427 had subsequent enrollment information for the term in which they applied to JMU.

Outcome	N	%
No Subsequent Enrollment Record Found	2,387	22.1%
Subsequent Enrollment Record Found	8,427	77.9%
Grand Total	12,760	100.0%

The following table outlines key information about the types of institutions attended by the applicants who went on to subsequently enroll at other institutions. Note that the numbers below may not total to 12,760 as some records were missing institutional characteristics.

Institutional Characteristics	N	%
Control		
Public	6,116	31.2%
Private	2,768	68.8%
Type		
2-year	261	2.9%
4-year	8,623	97.1%
Location		

In-State	659	7.4%
Out of State	8,225	92.6%
