ARMY NURSE CORPS MISSION

All actions and tasks must lead and work toward promoting the wellness of Warriors and their families, supporting the delivery of Warrior and family healthcare, and all those entrusted to our care and ultimately, positioning the Army Nurse Corps as a force multiplier for the future of military medicine.
Our Mission

The James Madison University “Duke” Battalion commissions 24 Line and 2 Nurse Second Lieutenants during fiscal year 2015 to meet US Army leadership requirements, who can think creatively and adaptively to lead small unit organizations, who can thrive in uncertainty and who will develop the character to be better citizens, committed to life long service to both their community and nation through military service.

Endstate:
An effective Army ROTC Program who turns willing young adults into tomorrow’s leaders of the Army, who are armed with lifelong skills to adapt, learn, and contribute through selfless service to their nation and community.
