

The OCPS STEM Bus Project

Why a STEM Bus?

To create a mobile STEM classroom to help remove the financial, transportation, and material barriers that keep some children from experiencing the hands-on, collaborative STEM activities

How are we planning to use the STEM Bus?

During the Summer:

- Free STEM Outreach that travels to different areas in Orange County.

During the School Year:

- Support classroom STEM instruction with grade-level specific activities
- Teacher professional development

Where are we now?

We have currently received grants for the full \$20,000 we budgeted for the build! This included:

- Flooring/Workspace
- Retractable Awning
- Display for Inside the Bus
- Solar Power Installation
- General Installation and Electrical Work

What are our current needs?

We will continue to pursue grants to purchase consumable student supplies and instructional materials. One of our summer outreach goals is to give a book to each child who visits the bus.
