Learn more about JMU’s pollinator efforts from:
ISNW: Education, Research, Outreach, Events, How to Participate, and More
FM: Bee Campus USA Committee, JMU Integrated Pest Management Plan, Habitat Plan, and More

**FEBRUARY**
Explore the Edith J. Carrier Arboretum’s Learning Portal for the 15th Annual Frances Litten Botanical Event. From February 22–28 only, access a curated list of videos with accompanying resources all about the topic of pollinators.

**MARCH**
Contact the ISNW to learn about multiple ways to be involved with bees and hives on campus. There are opportunities for faculty, staff, and students.

**APRIL**
Participate in the Pollinator Photo Showcase. Faculty, staff, and students are invited to submit photos that feature pollinators or pollinator habitats. Photos will be showcased online and open to the public in April.

**MAY**
Enjoy pollinators on a 1.1 mile walk in Downtown Harrisonburg and share your photos.

**ANY TIME**
Help “Bring Back the Pollinators” with four simple steps: grow pollinator-friendly flowers, provide nest sites, avoid pesticides, and spread the word. Consider putting your habitat on the map with the Xerces Society and then sharing your seeds with the Community Seed Library!

**ANY TIME**
Pick up a great book about pollinators. Choose from a suggested reading list curated by librarians at JMU, EMU, and the Massanutten Regional Libraries. With a range of genres and reading levels, there’s something for everyone!

JMU is a proud affiliate of Bee Campus USA
