This creative writing course will introduce you to the art and craft of writing poetry. Our focus is your own creative process, supported and directed by close readings of accomplished published poems. Through weekly writing and reading assignments, you will learn to use the poetic tools by which poets construct effective, meaningful, and memorable poems. As readers, you'll learn to provide constructive interpretation and critique of poems written by your peers in this class. And as writers in a workshop community, you will be guided to write original poems reflecting a wide range of stylistic and thematic choices.

REPRESENTATIONS OF MADNESS: How do we define madness? What is sanity? Where, if anywhere, is the boundary separating madness and sanity? For centuries, people in a variety of cultures and disciplines have attempted to answer these questions in many different ways. In this class, we will examine how literary and artistic works have provided ways to question the distinction between madness and sanity as well as open up space for the collapse of that separation. Examining works of literature critically, we will move from discussing to writing about how madness can be a productive space for writers and readers. We will use the lens of madness to read, discuss, and write about a number of genres derived from a variety of literary cultures.

CULTURAL CONSTRUCTIONS OF GIRLHOOD:

Books we read as children are important: they shape us as readers, as thinkers, as people. The stories of our childhood often impact who we will become and so might reveal new insights when analyzed in adulthood. This section moves beyond children's literature approaches, however, as we will interrogate depictions of girlhood in literature and popular media with particular attention paid to personal performances of girlhood and femininity in a variety of texts & the pages of great books, excerpts from film and television, popular songs, and online content. This online course includes intensive examination of great literary works that focus on key issues of knowledge and reality, meaning and purpose, ethics, and aesthetics, with emphasis on cultural constructions of girl identities and ways girls have been written by others and may be writing themselves. Particular attention will be paid to body image, the importance of place, and normative gender roles.

HUM 252 Gandhi, Nonviolence and Global Transformation								
This summer class, entitled Gandhi, Nonviolence and Global Transformation, is structured as an independent course, and offered online.								
(1) Course Description: Of all the world leaders in the twentieth century, Mohandas Karamchand Gandhi (1869 - 1948) is certainly one of the most influential. He is unique as a social theorist, a moral and spiritual philosopher, and a social and political activist. He serves as a bridge from post-modern to modern and pre-modern social thought, as well as between Western and non-Western scientific, technological, and spiritual traditions. His experience transcends geographical, political, and cultural boundaries. Even more, Gandhi's leadership changed the world. Indeed, it continues to change world. He challenged the dominant world structure of his time, the colonial system, and struggled with some of the most significant issues of our time: violence and terrorism, racism, the oppression of women, the role of religion in the modern world, the nature of capitalism, and conflict between ethnic

Topic - Religion and Education in the United States

This course serves as a senior capstone seminar, tying together the approaches and methods you have encountered in your previous coursework. In this course, we will examine our theme through a variety of lenses. Understanding the conversation between religion and education in the United States will enable us to study relevant and contested content through the work of a variety of scholars.

This class is designed to be delivered entirely online. This course is NOT designed like a "correspondence" course; you are expected to participate in online-classes, and collaborate with your classmates throughout the course. Students will NOT meet in a traditional college classroom, however, there will be required weekly meetings online on Monday and Thursday from 11:00 AM to 1:00 PM. Students are expected to attend all synchronous sessions. This course requires that your computer has a camera and microphone for participating in the synchronous sessions. All tests and the final exam will be held in the lockdown browser on Canvas.

We negotiate on a daily bases whether we are aware of it or not. Traditionally, most people think of negotiation as a formal process of sitting down at a table with someone who is an adversary and bargaining back and forth with the goal of obtaining something tangible. In this class, we will explore the process of negotiation from a communication and relational paradigm which can then be extended and applied to a variety of contexts including parent/child relationships, romantic relationships, friendships, and business relationships.

This course is offered on a contingency basis and could be cancelled if minimum enrollment of 10 is not met.

Internet Class: This course examines how social inequality shapes and is reproduced and challenged through digital information and communication technologies (computers, mobile and "smart" devices, the Internet, social media, and "big data"). Students will explore how the use of these technologies by consumers, corporations and governments plays an increasingly prominent role in how inequality is structured and experienced in contemporary society.

CULTURAL CONSTRUCTIONS OF GIRLHOOD Books we read as children are important: they shape us as readers, as thinkers, as people. The stories of our childhood often impact who we will become so might reveal new insights when analyzed in adulthood. This section moves beyond children's literature approaches, however, as we will interrogate depictions of girlhood in literature and popular media with particular attention paid to personal performances of girlhood and femininity in a variety of texts & the pages of great books, excerpts from film and television, popular songs, and online content. This online course includes intensive examination of great literary works that focus on key issues of knowledge and reality, meaning and purpose, ethics, and aesthetics, with emphasis on cultural construction of girl identities and ways girls have been written by others and may be writing themselves. Particular attention will be paid to body image, the importance of place, and normative gender roles.

The instructor, Dr. Tim Walton, spent 24 years as an analyst at the Central Intelligence Agency. This course helps to fulfill the requirements for the US Geospatial Intelligence Foundation's Geospatial Intelligence Certificate. Students from any major are welcome; but those without a geospatial background will have to exert extra effort early in the course to become familiar with the basics. Materials on these basics will be made available.
